SUPPLEMENTARY INFORMATION:

Background Information

The NRC issues LR-ISGs to communicate insights and lessons learned and to address emergent issues not covered in license renewal guidance documents, such as the GALL Report

and SRP-LR. In this way, the NRC staff and stakeholders may use the guidance in an LR-ISG document before it is incorporated into a formal license renewal guidance document revision. The NRC staff issues LR-ISGs in accordance with the LR-ISG Process, Revision 2 (ADAMS Accession No. ML100920158), for which a notice of availability was published in the **Federal Register** on June 22, 2010 (75 FR 35510).

The NRC staff developed LR-ISG-2011-04 to update its guidance in SRP-LR and GALL Report based on the conclusions of the NRC's revised safety evaluation on Electric Power Research Institute (EPRI) Technical Report No. 1022863, *Materials Reliability Program: Pressurized Water Reactor Internals Inspection and Evaluation Guidelines (MRP-227-A)*, dated December 2011 (ADAMS Accession No. ML12017A193 [Transmittal letter from the EPRI-MRP] and ADAMS Accession Nos. ML12017A194, ML12017A196, ML12017A197, ML12017A191, ML12017A192, ML12017A195 and ML12017A199 [Final Report]). The NRC's revised safety evaluation of EPRI Technical Report No. 1022863 may be accessed in ADAMS under Accession No. ML11308A770. The LR-ISG-2011-04 revises the recommendations in the GALL Report and the NRC staff's acceptance criteria and review procedures in the SRP-LR to ensure consistency with MRP-227-A and provides a framework to ensure that PWR license renewal applicants will adequately address age-related degradation and aging management of reactor vessel internal components during the term of the renewed license.

On March 20, 2012, (77 FR 16270), the NRC requested public comments on draft LR-ISG-2011-04. Subsequently, as published on April 19, 2012, (77 FR 23513), the NRC issued an editorial correction to the original notice to specifically identify the ADAMS Accession No. for additional documents associated with draft LR-ISG-2011-04.

The NRC received comments from the Nuclear Energy Institute by letter dated May 21, 2012 (ADAMS Accession No. ML12144A147), and from the Electric Power Research Institute and the Pressurized Water Reactor Owners Group Materials Subcommittee by letter dated May, 21, 2012 (ADAMS Accession No. ML12146A267). No other comments were submitted. The NRC considered these comments in developing the final LR-ISG. Detailed responses to the comments can be found in Appendix C of the final LR-ISG.

The final LR-ISG-2011-04 is approved for NRC staff and stakeholder

use and will be incorporated into NRC's next license renewal guidance document revision.

Backfitting and Issue Finality

Issuance of this final LR-ISG does not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in Part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants" of 10 CFR. The basis for this determination is set forth in the "Backfitting and Issue Finality" section of the final LR-ISG.

II. Background

During recent years, there have been a number of licensing actions submitted to the NRC for review where issues related to FOCD existed. One cause is likely due to the increased globalization of economic activity and associated added complexity of the corporate arrangements. In response, the NRC's review of FOCD issues have become more numerous and detailed. Sections 103d. and 104d. of the Atomic Energy Act of 1954, as amended, (AEA), provide that the NRC may not issue a license to a corporation or other entity if the Commission knows (or has reason to believe) that it is owned, controlled, or dominated by an alien, a foreign corporation or a foreign government. Moreover, the NRC may not, in any event, issue a license to any person within the United States if, in the opinion of the Commission, the issue of a license to such person would be inimical to the common defense and security or to the health and safety of the public.

The Commission's regulation under Section 50.38 of Title 10 of the *Code of Federal Regulations* (10 CFR)
