deposit rate will be that for the PRC-wide entity (i.e., 308.33 percent); and (4) for all non-PRC exporters of the subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporter that supplied the non-PRC exporter. These cash deposit requirements, when imposed, shall remain in effect until further notice.

**Notification to Importers**

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in the Secretary’s presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

**Administrative Protective Order**

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing this administrative review and notice in accordance with sections 751(a)(1) and 777(i) of the Act.

**DATES:**

Ronald K. Lorentzen,
Acting Assistant Secretary for Import Administration.

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**RIN 0648–XC684**

**Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; request for comments.

**SUMMARY:** The Assistant Regional Administrator for Sustainable Fisheries, Northeast Region, NMFS (Assistant Regional Administrator), has made a preliminary determination that an Exempted Fishing Permit application submitted by the Northeast Fisheries Science Center contains all of the required information and warrants further consideration. The Exempted Fishing Permit would exempt participating vessels from the following types of fishery regulations: Minimum fish size restrictions; fish possession limits; prohibited fish species, not including species protected under the Endangered Species Act; and gear-specific fish possession restrictions for the purpose of collecting fishery dependent catch data and biological samples.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on Exempted Fishing Permit applications. **DATES:** Comments must be received on or before June 21, 2013.

**ADDRESSES:** You may submit written comments by any of the following methods:

- **Email:** nero.efp@noaa.gov. Include in the subject line “Comments on NEFSC Study Fleet EFP.”
- **Mail:** John K. Bullard, Regional Administrator, NMFS, NE Regional Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope “Comments on NEFSC Study Fleet EFP.”
- **Fax:** (978) 281–9135.

**FOR FURTHER INFORMATION CONTACT:** Liz Sullivan, Fishery Management Specialist, 978–282–8493, Liz.Sullivan@noaa.gov.

**SUPPLEMENTARY INFORMATION:** Northeast Fisheries Science Center (NEFSC) submitted a complete application for an Exempted Fishing Permit (EFP) on April 11, 2013, to enable data collection activities that the regulations on commercial fishing would otherwise restrict. The EFP would exempt 29 federally permitted commercial fishing vessels from the regulations detailed below while participating in the Study Fleet Program and operating under projects managed by the NEFSC. The EFP would exempt participating vessels from minimum fish size restrictions; fish possession limits; prohibited fish species, not including species protected under the Endangered Species Act; and gear-specific fish possession restrictions for the purpose of at-sea sampling and, in limited situations for research purposes only, to retain and land fish.

The NEFSC Study Fleet Program was established in 2002 to more fully characterize commercial fishing operations and to leverage sampling opportunities to augment NMFS data collection programs. Participating vessels are contracted by NEFSC to collect tow by tow catch and environmental data, and to fulfill specific biological sampling needs identified by NEFSC. To collect these data, the NEFSC Study Fleet Program has obtained an EFP to secure the necessary waivers needed by the vessels to obtain fish that would otherwise be prohibited by regulations.

Crew trained by the NEFSC Study Fleet Program in methods that are consistent with the current NEFSC observer protocol, while under fishing operations, would sort, weigh, and measure fish that are to be discarded. An exemption from minimum fish size restrictions; fish possession limits; prohibited fish species, not including species protected under the Endangered Species Act; and gear-specific fish possession restrictions for at-sea sampling is required because some discarded species would be on deck slightly longer than under normal sorting procedures.

Participating vessels would also be authorized to retain and land, in limited situations for research purposes only, fish that do not comply with fishing regulations. The vessels would be authorized to retain specific amounts of particular species in whole or round weight condition, in marked totes, which would be delivered to Study Fleet Program technicians. The NEFSC would require participating vessels to obtain written approval from the NEFSC Study Fleet Program prior to landing any fish in excess of possession limits and/or below minimum size limits to ensure that the landed fish do not exceed any of the Study Fleet Program’s collection needs, as detailed below. None of the landed biological samples from these trips would be sold for commercial use or used for any other purpose other than scientific research.

The table below details the regulations from which the participating vessels would be exempt when retaining and landing fish for research purposes. The participating vessels would be required to comply with all other applicable requirements and restrictions specified at 50 CFR part 648, unless specifically exempted in this EFP. All catch of stocks allocated to Sectors by vessels participating in a Sector trip would be deducted from the Sector’s Annual Catch Entitlement (ACE) for each sector.
Northeast multispecies stock regardless of what fishery the vessel was participating in when the fish was caught. Once a sector’s ACE for a stock has been reached, vessels would no longer be allowed to fish in that stock area, unless they acquired additional ACE for the limiting stock. Non-sector vessels would be exempted from possession restriction as identified below in the table, but would still be subject to trimester total allowable catch (TAC) accountability measures applicable to non-sector vessels, which state that when 90 percent of the trimester TAC for a stock is projected to be caught, the area where that stock is predominantly caught will close to vessels fishing with a specific gear type for the rest of that trimester.

### NEFSC Study Fleet Program’s Sampling Needs

- **Haddock**—whole fish would be retained for maturity and fecundity research. The haddock retained would not exceed 30 fish per trip, or 360 fish for all trips. The maximum weight of haddock on any trip would not exceed 120 lb (54.43 kg) total weight per trip, and would not exceed 1,440 lbs (653.17 kg) for all trips combined.
  - Yellowtail Flounder—whole fish would be retained for maturity, fecundity, bioelectrical impedance analysis (BIA), food habits, and genetic research. The yellowtail flounder retained would not exceed 200 fish per month from each of the three stock areas (Gulf of Maine (GOM), Georges Bank (GB), Southern New England/Mid-Atlantic (SNE/MA)), or 1,200 fish total from each stock area for all trips. The maximum weight on any trip would not exceed 300 lbs (136.08 kg) total weight, and would not exceed 75 lbs (34.02 kg) total weight per trip.
  - Summer Flounder—whole fish would be retained for maturity, fecundity, BIA, food habits, and genetic research. The summer flounder retained would not exceed 200 fish per month from each of the three stock areas (GOM, GB, SNE/MA), or 1,200 fish total from each stock area for all trips. The maximum weight on any trip would not exceed 30 lbs (13.61 kg) total weight, and would not exceed 4,500 lbs (2,041.17 kg) for all trips combined.
- **Winter Flounder**—whole fish would be retained for maturity, fecundity, BIA, food habits, and genetic research. The winter flounder retained would not exceed 200 fish per month from each of the three stock areas (GOM, GB, SNE/MA), or 1,200 fish total from each stock area for all trips. The maximum weight on any trip would not exceed 300 lbs (136.08 kg) total weight, and would not exceed 8,500 lbs (3,855.54 kg) for all trips combined.
- **Atlantic wolffish**—whole fish would be retained for maturity, fecundity, and life history research. Atlantic wolffish retained would not exceed 30 fish per month or 360 fish combined.
- **Monkfish**—whole fish would be retained for reproductive biology research. Monkfish retained would not exceed 60 fish per month from each of the two stock areas (GOM, SNE/MA), or 720 fish total for all trips. The maximum weight on any trip would not exceed 350 lbs (158.76 kg), and would not exceed 4,200 lbs (1,905.09 kg) total for all trips.
- **Spiny Dogfish**—whole fish would be retained for reproductive biology research. The spiny dogfish retained would not exceed 60 fish per month from each of the two stock areas (GOM, SNE/MA), or 720 fish total for all trips. The maximum weight on any trip would not exceed 350 lbs (158.76 kg), and would not exceed 4,200 lbs (1,905.09 kg) total for all trips.
- **Black sea bass**—whole fish would be retained for reproductive biology research. Black sea bass retained would not exceed 20 fish per 3-month period, or 80 skates total for all trips. The maximum weight on any trip would not exceed 75 lbs (34.02 kg) total weight, and would not exceed 300 lbs (136.08 kg) total for all trips combined.
- **Skate**—whole fish would be retained for age and growth research and species confirmation. The spiny dogfish retained would not exceed 60 fish per month from each of the two stock areas (GOM, SNE/MA), or 720 fish total for all trips. The maximum weight on any trip would not exceed 350 lbs (158.76 kg), and would not exceed 4,200 lbs (1,905.09 kg) total for all trips.
- **Thorny Skate**—whole fish would be retained for age and growth research and species confirmation. Thorny Skate retained would not exceed 20 fish per 3-month period, or 80 skate total for all trips. The maximum weight on any trip would not exceed 75 lbs (34.02 kg) total weight, and would not exceed 300 lbs (136.08 kg) total for all trips combined.
- **Thorny skate**—whole fish would be retained for reproductive biology research. Thorny Skate retained would not exceed 60 fish per month from each of the two stock areas (GOM, SNE/MA), or 720 fish total for all trips. The maximum weight on any trip would not exceed 350 lbs (158.76 kg), and would not exceed 4,200 lbs (1,905.09 kg) total for all trips.
- **Barndoor Skate**—whole fish would be retained for age and growth research and species confirmation. Barndoor Skate retained would not exceed 20 fish per 3-month period, or 80 skate total for all trips. The maximum weight on any trip would not exceed 75 lbs (34.02 kg) total weight, and would not exceed 300 lbs (136.08 kg) total for all trips combined.
- **Black Sea Bass**—whole fish would be retained for examination of seasonal and latitudinal patterns in energy allocation. This effort is in support of an ongoing study at the NEFSC to evaluate BIA to measure fish energy density and reproductive potential for stock assessment. Black sea bass retained would not exceed 75 fish per trip or 300 black sea bass total for all trips. The maximum weight on any trip would not exceed 250 lbs (113.40 kg) total weight, and would not exceed 1,000 lbs (453.59 kg) total for all trips combined.
- **Atlantic wolffish**—whole fish would be retained for maturity, fecundity, and life history research. Atlantic wolffish retained would not exceed 30 fish per month or 360 fish combined.

### Posession restrictions:

- § 648.83 NE multispecies minimum size.
- § 648.93 Monkfish minimum fish size.
- § 648.104 Summer flounder minimum fish size.
- § 648.147 Black sea bass minimum fish size.
- § 648.86(d) Haddock.
- § 648.86(b) Atlantic cod.
- § 648.86(g) Yellowtail flounder.
- § 648.86(i) Georges Bank winter flounder.
- § 648.86(o) Possession limits implemented by RA.
- § 648.94 Monkfish possession limit.
- § 648.106 Summer flounder possession restrictions.
- § 648.322 Skate possession and landing restrictions.
- § 648.145 Black sea bass possession limits.
- § 648.235 Spiny dogfish possession and landing restrictions.
total for all trips. The maximum weight on any trip would not exceed 120 lb (54.4 kg) and would not exceed 3,000 lb (1,360.8 kg) total for all trips combined.

- Cusk—whole fish would be retained for maturity, fecundity, and life history research. Cusk retained would not exceed 30 fish per month or 360 fish total for all trips. The maximum weight on any trip would not exceed 100 lb (45.4 kg) and would not exceed 2,300 lb (1,043.3 kg) total for all trips combined. If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impact that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Authority: 16 U.S.C. 1801 et seq.

Dated: June 3, 2013.

Kara Meckley,
Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–BD32

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Comprehensive Fishery Management Plan for the Exclusive Economic Zone of Puerto Rico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent (NOI) to prepare a draft environmental impact statement (DEIS); scoping meetings; request for comments.

SUMMARY: NMFS, Southeast Region, in collaboration with the Caribbean Fishery Management Council (Council), intends to prepare a DEIS to describe and analyze a range of management alternatives for management actions to be considered when developing and establishing a Comprehensive Fishery Management Plan (FMP) for the exclusive economic zone (EEZ) of Puerto Rico. The purpose of this NOI is to inform the public of upcoming opportunities to provide comments on the actions to be addressed in the DEIS, as specified in this notice.

DATES: Written comments on the scope of issues to be addressed in the DEIS must be received by NMFS by July 8, 2013. The scoping meetings will be held in July 2013. For specific dates and times, see SUPPLEMENTARY INFORMATION, under the heading, “Scoping Meetings”.

ADDRESSES: You may submit comments on the DEIS, identified by “NOAA–NMFS–2013–0093”, by any of the following methods:

- Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#!docketDetail;D=NOAA–NMFS–2013–0093, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- Mail: Submit written comments to Miguel Lugo, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701, or to the Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico 00918.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

Electronic copies of the scoping document may be obtained from the Southeast Regional Office Web site at http://sero.nmfs.noaa.gov/sustainable_fisheries/caribbean/island_based/index.html.

The scoping meetings will be held in Puerto Rico and in the U.S. Virgin Islands. For specific locations, see SUPPLEMENTARY INFORMATION, under the heading, “Scoping Meetings”.

FOR FURTHER INFORMATION CONTACT: Miguel Lugo, phone 727–824–5305, email Miguel.Lugo@noaa.gov; or Graciela Garcia-Moliner, phone 787–766–5927, email Graciela.Garcia-Moliner@noaa.gov.

SUPPLEMENTARY INFORMATION: Currently, the Council manages Federal fisheries in the U.S. Caribbean under four species-based FMPs: The Spiny Lobster FMP of Puerto Rico and the U.S. Virgin Islands (Spiny Lobster FMP), the Reef Fish FMP of Puerto Rico and the U.S. Virgin Islands (Reef Fish FMP), the Corals and Reef Associated Plants and Invertebrates FMP of Puerto Rico and the U.S. Virgin Islands (Coral FMP), and the FMP for the Queen Conch Resources of Puerto Rico and the U.S. Virgin Islands (Queen Conch FMP). The fishers, fishing community representatives, and the local governments of Puerto Rico and the U.S. Virgin Islands (USVI) have frequently requested the Council consider the differences between the islands or island groups when addressing fisheries management in the U.S. Caribbean to recognize the unique attributes of each U.S. Caribbean island. By developing island-based FMPs, NMFS and the Council would better account for differences among the U.S. Caribbean islands with respect to culture, markets, gear, seafood preferences, and the ecological impacts that result from these differences.

At its 145th meeting, held on March 26–27, 2013, the Council decided to transition from species-based fisheries management to island-based fisheries management. If approved, a comprehensive FMP for fisheries management off Puerto Rico, in conjunction with similar comprehensive FMPs for fisheries management off St. Croix and off St. Thomas/St. John, would replace the existing species-based FMPs.

Also at its March meeting, the Council voted to hold scoping meetings in July 2013 to receive public feedback on possible actions and alternatives to consider during the development of the Puerto Rico FMP, the St. Croix FMP, and the St. Thomas/St. John FMP. The Council could develop the comprehensive FMPs without significant changes to current Federal fisheries management. For example, the 2010 Caribbean Annual Catch Limit (ACL) Amendment (76 FR 82404, December 30, 2011) and the 2011 Caribbean ACL Amendment (76 FR 82414, December 30, 2011) established ACLs by island or island group with specific ACLs for the Puerto Rico EEZ. The spatial and species-based attributes of these Puerto Rico ACLs, more than likely, would not change when developing the new FMP.

However, a re-arrangement from species-based FMPs to island-based FMPs also provides an opportunity for the Council to update management regulations that are outdated or do not reflect the current state of issues in the Puerto Rico EEZ. In the comprehensive Puerto Rico FMP, the Council is...
