

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) invites public comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* The Office of Federal and State Materials and Environmental Management Programs Requests to Agreement States for Information.
2. *Current OMB approval number:* 3150-0029.
3. *How often the collection is required:* One-time or as-needed.
4. *Who is required or asked to report:* Thirty-seven Agreement States who have signed Section 274(b) Agreements with the NRC.
5. *The number of annual respondents:* 37.
6. *The number of hours needed annually to complete the requirement or request:* 3,690.

7. *Abstract:* The Agreement States are asked on a one-time or as-needed basis to respond to a specific incident, to gather information on licensing and inspection practices or other technical and training-related information. In 2007, the NRC policy changed to begin funding training for Agreement State materials licensing and inspection staff and associated travel to attend courses offered through the NRC training program. The results of such information requests, which are authorized under Section 274(b) of the Atomic Energy Act, are utilized in part by the NRC in preparing responses to Congressional inquiries. The Agreement State comments are also solicited in the areas of proposed procedures, implementing guidance, and in the development of new and revised regulations and policies.

Submit, by August 5, 2013, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
