The Commission established a recordkeeping procedure in section 97.303(s) that required that amateur operator licensees using other antennas must maintain in their station records either manufacturer data on the antenna gain or calculations of the antenna gain.

The amateur radio service governed by 47 CFR part 97 of the Commission's rules, provides spectrum for amateur radio service licensees to participate in a voluntary noncommercial communication service which provides emergency communications and allows experimentation with various radio techniques and technologies to further the understanding of radio use and the development of technologies.

The information collection is used to calculate the effective radiated power (ERP) that the station is transmitting to ensure that ERP does not exceed 100 W PEP.

Federal Communications Commission.
