The small entities that would be affected by these proposed waivers and extensions are the eight grantees selected in FY 2007 currently receiving Federal funds, the 24 grantees selected in FY 2008 currently receiving Federal funds, and any other potential applicant for the estimated 32 awards for which there would have been a competition in FY 2013.

The Department certifies that the proposed waivers and extensions would not have a significant economic impact on these entities because the proposed waivers and extensions impose minimal compliance costs to extend projects already in existence, and the activities required to support the additionally of funding would not impose additional regulatory burdens or require unnecessary Federal supervision.
