Proposed Project

Formative Research, Messages and Materials Development for NCBDDD—NEW—Centers for Disease Control and Prevention (CDC), National Center on Birth Defects and Developmental Disabilities (NCBDDD).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC), National Center on Birth Defects and Developmental Disabilities (NCBDDD), requests approval for a new generic information collection package that supports formative research in birth defects and developmental disabilities; human development and disabilities, and blood disorders. Identified priority diseases, disorders, and conditions included in this information collection activity include but are not limited to preconception health; autism spectrum disorders (ASDs) and other developmental disabilities; fetal alcohol spectrum disorders (FASDs); neural tube defects (spina bifida, anencephaly); muscular dystrophy; fragile X; deep vein thrombosis/pulmonary embolism (DVT/PE); sickle cell disease (SCD); attention-deficit/hyperactivity disorder (ADHD); and Tourette syndrome.

Birth defects affect 1 in 33 babies and are a leading cause of infant death in the United States. More than 5,500 infants die each year due to birth defects. Additionally, over 500,000 children are diagnosed with a developmental disability. With more information, the causes of these birth defects and developmental disabilities can be identified and action can be taken to protect children and to develop new
