in any one year. Further, the administrative final rule will not significantly or uniquely affect small
governments. It does not require action by any non-Federal government entity.
Therefore, the information required by the Unfunded Mandates Reform Act (2
U.S.C. 1531 et. seq.), is not required.

Executive Order 12630, Government
Action and Interference With
Constitutionally Protected Property
Rights (Takings)

As required by Executive Order 12630, the Department of the Interior has
determined that the rule would not cause a taking of private property. No
private property rights would be affected by a rule that merely reports an
address change for the Oregon/
Washington State Office. The
Department therefore certifies that this
administrative final rule does not represent a governmental action capable of
interference with constitutionally protected property rights.

Executive Order 13132, Federalism

In accordance with Executive Order
13132, the BLM finds that the rule does not have sufficient federalism
implications to warrant the preparation of a federalism summary impact
statement.

The administrative final rule does not have substantial direct effects on the
States, on the relationship between the national governments and the States, or
the distribution of power and the responsibilities among the various
levels of government. This
administrative final rule does not preempt State law.

Executive Order 12988, Civil Justice
Reform

This administrative final rule is a
purely administrative regulatory action
having no effects upon the public and will not unduly burden the judicial system
and may not require the requirements of Sections 3(a) and 3(b)(2) of the
Executive Order.

Executive Order 13175, Consultation
and Coordination With Indian Tribal
Governments

In accordance with the Executive Order 13175, the BLM finds that the
rule does not include policies that have tribal implications. This administrative
final rule is purely an administrative action having no effects upon the public
or the environment, imposing no costs,
and merely updating the BLM, Oregon/
Washington State Office address
included in the Code of Federal
Regulations.

Executive Order 13211, Actions
Concerning Regulations That
Significantly Affect Energy Supply,
Distribution, or Use

In accordance with Executive Order
13211, the BLM has determined that the administrative final rule will not have
substantial direct effects on the energy
supply, distribution or use, including a shortfall in supply or price increase.
This administrative final rule is a purely administrative action and has no
implications under Executive Order
13211.

Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, et seq.

List of Subjects in 43 CFR Part 1820

Administrative practice and
procedure, Archives and records, Public
lands.

Dated: June 4, 2013.

Tommy P. Beaudreau,
Acting Assistant Secretary, Land and
Minerals Management.

For the reasons discussed in the
provision, the Bureau of Land
Management amends 43 CFR part 1820
as follows:

PART 1820—APPLICATION
PROCEDURES

1. The authority citation for part 1820
continues to read as follows:

Subpart 1821—General Information

2. Amend § 1821.10 in paragraph (a) by removing the entry for Oregon
and adding in its place an entry for Oregon/
Washington to read as follows:

§ 1821.10 Where are BLM offices located?

(a) * * *

STATE OFFICES AND AREAS OF
JURISDICTION

* * * * * *

Oregon/Washington State Office, 1220
SW. 3rd Avenue, Portland, Oregon
97204, P.O. Box 2965, Portland, Oregon
97208—Oregon and Washington.

BILLING CODE 4310–33–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric
Administration

50 CFR Part 622

[Docket No. 120919470–3513–02]

RIN 0648–BC58

Fisheries of the Caribbean, Gulf of
Mexico, and South Atlantic; Shrimp
Fishery Off the Southern Atlantic
States; Amendment 9

AGENCY: National Marine Fisheries
Service (NMFS), National Oceanic and
Atmospheric Administration (NOAA),
Commerce.

ACTION: Notification of final action;
revision to Fishery Management Plan.

SUMMARY: NMFS issues this final rule to
implement Amendment 9 (Amendment
9) to the Fishery Management Plan for
the Shrimp Fishery of the South
Atlantic Region (FMP), as prepared and
submitted by the South Atlantic Fishery
Management Council (Council). This
final rule revises the criteria and
procedures by which a South Atlantic
state may request a concurrent closure
of the exclusive economic zone (EEZ) to
the commercial harvest of penaeid
shrimp (brown, pink, and white shrimp)
when state waters close as a result of
severe winter weather. Amendment 9
also revises the overfished and
overfishing status determination criteria
for pink shrimp. The purpose of this
rule is to increase the flexibility and
timeliness of the criteria and process for
implementing a concurrent closure of
penaeid shrimp harvest in the EEZ to
maximize protection of overwintering
white shrimp in the South Atlantic.

DATES: This rule is effective July 15,
2013.

ADDRESSES: Electronic copies of
Amendment 9, which includes an
environmental assessment, and a
regulatory impact review, may be
obtained from the Southeast Regional
Office Web site at http://
sery.nmfs.noaa.gov.

FOR FURTHER INFORMATION CONTACT: Kate
Michie, telephone: 727–824–5305, or
email: kate.michie@noaa.gov.

SUPPLEMENTARY INFORMATION: The
penaeid shrimp fishery of the South
Atlantic is managed under the FMP. The
FMP was prepared by the Council and
is implemented through regulations at
50 CFR part 622 under the authority of
the Magnuson-Stevens Act.

On March 4, 2013, NMFS published a
notice of availability for Amendment
9 and requested public comment (78 FR
On March 20, 2013, NMFS published a proposed rule for Amendment 9 and requested public comment (78 FR 17178). The proposed rule and Amendment 9 outline the rationale for the actions contained in this final rule. A summary of the actions implemented by this final rule is provided below.

Management Measures Contained in This Final Rule

The management measures contained in Amendment 9 and this final rule do not require any changes to the current regulatory text within § 622.206(a), “South Atlantic shrimp cold weather closure.” This is because the current regulations refer to the FMP for the specific criteria and procedures required to implement a concurrent closure of the EEZ for penaeid shrimp. This final rule revises those criteria and procedures within the FMP; however, the regulatory text does not change.

Criteria Used to Trigger a State’s Ability To Request a Concurrent Closure of the EEZ to Penaeid Shrimp Commercial Harvest

This final rule revises the criteria that a state must meet to request from NMFS a closure of commercial penaeid shrimp harvest in Federal waters following severe winter weather and a closure of state waters. Currently, a state must demonstrate at least an 80-percent reduction in the population of overwintering white shrimp in order to justify a closure. This rule requires that a state must demonstrate either at least an 80-percent reduction in the population of overwintering white shrimp, or that state water temperatures were 9 °C (48 °F) or less, for at least 7 consecutive days. These revised criteria provide increased flexibility for a state to protect the overwintering white shrimp in adjacent EEZ waters.

Process for a State To Request a Concurrent Closure of the EEZ To Penaeid Shrimp Commercial Harvest

This final rule revises the procedures for a state to request a closure of the penaeid shrimp commercial sector in the EEZ concurrent with a closure of its state waters. The revised procedures allow a state, after determining that the revised concurrent closure criteria have been met, to submit a letter directly to the NMFS Regional Administrator (RA) with the request and supporting data for a concurrent closure of penaeid shrimp harvest in the EEZ adjacent to the closed state waters. After a review of the requesting information, if the RA determines the recommended closure is in accordance with the procedures and criteria specified in the FMP and the Magnuson-Stevens Act, NMFS would implement the closure through a notification in the Federal Register. These revised procedures reduce the administrative burden to the states and the Council through their more efficient process.

Additional Management Measure Contained in Amendment 9

Amendment 9 also revises the overfished and overfishing status determination criteria (biomass at the maximum sustainable yield (BMSY)) for the pink shrimp stock. BMSY proxy is revised based on more recent Southeast Area Monitoring and Assessment Program (SEAMAP) harvest data for pink shrimp. Specifically, Amendment 9 revises the BMSY proxy for pink shrimp using the lowest catch per unit effort (CPUE) value from SEAMAP during the period 1990–2011 (0.089 individuals per hectare). The Council and NMFS determined that the pink shrimp stock that produced the relatively low CPUE value of 0.089 individuals per hectare does not compromise the long-term capacity of the pink shrimp stock to achieve MSY, because the low stock size has historically produced a biomass the following year that is capable of achieving MSY, based on the best available science.

Comments and Responses

NMFS received two comment submissions on Amendment 9 and the proposed rule. One letter was from an individual that expressed support for Amendment 9 and the proposed rule and the other submission was from a Federal agency stating that they had no comments on Amendment 9 or the proposed rule. No other comments were received. NMFS agrees with the individual commenter that this amendment will help protect overwintering white shrimp.

Changes From the Proposed Rule

On April 17, 2013, NMFS published in the Federal Register an interim final rule to reorganize the regulations in 50 CFR part 622 for the Gulf of Mexico, South Atlantic, and the Caribbean (78 FR 22950). That interim final rule did not create any new rights or obligations; it reorganized the existing regulatory requirements in the Code of Federal Regulations into a new format. This final rule incorporates this new format but does not change the specific regulatory measures that were discussed in the proposed rule. As a result of this reorganization, the shrimp cold weather closure regulatory text previously located at § 622.35(d) is now located at § 622.206(a).

Classification

The Regional Administrator, Southeast Region, NMFS, has determined that this final rule is necessary to more efficiently manage the penaeid shrimp resource, and is consistent with the Magnuson-Stevens Act and other applicable laws.

This final rule has been determined to be not significant for purposes of Executive Order 12866. No duplicative, overlapping, or conflicting Federal rules have been identified. This final rule would not establish any new reporting or record-keeping requirements.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

Authority: 16 U.S.C. 1801 et seq.

Dated: June 4, 2013.

Alan D. Risenhoover,
Director, Office of Sustainable Fisheries, Performing the functions and duties of the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.
