

of a half (½) or a half (½) of a half (½) of a half (½) is based on the proper subdivision of section as per the Manual of Survey Instructions.

The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the planning process. Preliminary issues for the planning area have been identified by BLM personnel, other agencies, and in meetings with individuals and user groups. These issues are:

1. Should public land be disposed of in order to promote economic opportunities and community expansion for the Village of Hatch, New Mexico?

2. What potential impacts would this proposed action have on the ability of the BLM to manage surrounding parcels of land?

3. What effects would this proposed action have on existing uses in the area?

4. What important public objectives will be served?

Proposed planning criteria include the following:

1. The RMP Amendment/EA process will be in compliance with the Federal Land Policy and Management Act, the National Environmental Policy Act, and applicable laws, regulations, and policies.

2. The land use plan amendment process will be governed by the planning regulations at 43 CFR part 1610 and the BLM Land Use Planning Handbook H-1601-1.

3. Lands affected by the proposed plan amendment only apply to public surface and mineral estate managed by the BLM. No decisions will be made relative to non-BLM-administered land or non-Federal minerals.

4. Public participation will be an integral part of the planning process.

5. The plan amendment will recognize all valid existing rights.

6. The RMP Amendment/EA will strive to be consistent with existing non-Federal plans and policies, provided the decisions in the existing plans are consistent with the purposes, policies, and programs of Federal laws, and regulations applicable to public lands. The RMP Amendment will consider present and potential uses of public land.

7. The RMP Amendment will consider impacts of uses on adjacent or nearby non-Federal lands and on non-Federal land surface over federally-owned minerals.

The BLM will evaluate identified issues to be addressed in the plan amendment and will place them into one of three categories:

1. Issues to be resolved in the plan amendment;
2. Issues to be resolved through policy or administrative action; or
3. Issues beyond the scope of this plan amendment.

The BLM will provide an explanation in the plan amendment as to why an issue was placed in category two or three. The public is also encouraged to help identify any management questions and concerns that should be addressed in the plan amendment.

The BLM will work collaboratively with interested parties to identify the management decisions that are best suited to local, regional, and national needs and concerns.

The BLM will use an interdisciplinary approach to develop the plan amendment to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in the planning process: Minerals and geology, outdoor recreation, archaeology, paleontology, wildlife and fisheries, lands and realty, hydrology, soils, water and air.

The public may submit comments on issues and planning criteria in writing directly to the BLM using one of the methods listed in the **ADDRESSES** section above. Comments should be submitted within 30 days from the date of the publication of this notice.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

1605.29.10 of the Harmonized Tariff Schedule of the United States, that are preliminarily found to be subsidized by the Governments of China, India, Malaysia, Thailand, and Vietnam and that are alleged to be subsidized by the Governments of Ecuador and Indonesia.^{1,2}

¹ The Department of Commerce preliminarily determined that imports of frozen warmwater shrimp from Ecuador and Indonesia are not being and are not likely to be subsidized by the Government of Ecuador or the Government of Indonesia.

² For purposes of these investigations, the Department of Commerce has defined the subject merchandise as "certain frozen warmwater shrimp and prawns, whether wild-caught (ocean harvested) or farm-raised (produced by aquaculture), head-on or head-off, shell-on or peeled, tail-on or tail-off, deveined or not deveined, cooked or raw, or otherwise processed in frozen form, regardless of size."

"The frozen warmwater shrimp and prawn products included the scope, regardless of definitions in the Harmonized Tariff Schedule of the United States ("HTSUS"), are products which are processed from warmwater shrimp and prawns through freezing and which are sold in any count size.

"The products described above may be processed from any species of warmwater shrimp and prawns. Warmwater shrimp and prawns are generally classified in, but are not limited to, the *Penaeidae* family. Some examples of the farmed and wild-caught warmwater species include, but are not limited to, whiteleg shrimp (*Penaeus vannamei*), banana prawn (*Penaeus merguiensis*), fleshy prawn (*Penaeus chinensis*), giant river prawn (*Macrobrachium rosenbergii*), giant tiger prawn (*Penaeus monodon*), redspotted shrimp (*Penaeus brasiliensis*), southern brown shrimp (*Penaeus subtilis*), southern pink shrimp (*Penaeus notialis*), southern rough shrimp (*Trachypenaeus curvirostris*), southern white shrimp (*Penaeus schmitti*), blue shrimp (*Penaeus stylorostris*), western white shrimp (*Penaeus occidentalis*), and Indian white prawn (*Penaeus indicus*).

"Frozen shrimp and prawns that are packed with marinade, spices or sauce are included in the scope. In addition, food preparations (including dusted shrimp), which are not 'prepared meals,' that contain more than 20 percent by weight of shrimp or prawn are also included in the scope.

"Excluded from the scope are: (1) Breaded shrimp and prawns; (2) shrimp and prawns generally classified in the *Pandalidae* family and commonly referred to as coldwater shrimp, in any state of processing; (3) fresh shrimp and prawns whether shell-on or peeled; (4) shrimp and prawns in prepared meals; (5) dried shrimp and prawns; (6) canned warmwater shrimp and prawns; and (7) certain 'battered shrimp.'

"Battered shrimp" is a shrimp-based product: (1) That is produced from fresh (or thawed-from-frozen) and peeled shrimp; (2) to which a 'dusting' layer of rice or wheat flour of at least 95 percent purity has been applied; (3) with the entire surface of the shrimp flesh thoroughly and evenly coated with the flour; (4) with the non-shrimp content of the end product constituting between four and 10 percent of the product's total weight after being dusted, but prior to being frozen; and (5) that is subjected to individually quick frozen ("IQF") freezing immediately after application of the dusting layer. When dusted in accordance with the definition of dusting above, the battered shrimp product is also coated with a wet viscous layer containing egg and/or milk, and par-fried.
