**SUPPLEMENTARY INFORMATION:**

**Table of Contents**

- I. Background
- II. Analysis of State Rule and Clean Air Act (CAA or Act) Requirements
- III. Proposed Action
- IV. Statutory and Executive Order Review

**I. Background**

The first significant amendments to the CAA occurred in 1970 and 1977. Following these amendments, a large number of SIPs were submitted to EPA to fulfill new federal requirements. In many cases, states and districts submitted their entire programs, including many elements not required pursuant to the Act. In the 1980's and early 1990's, many states revised their regulations to simplify them through recodification and to correct regulations that were submitted as a part of the first programs submitted that included elements that did not pertain to attainment of the NAAQS.

EPA records indicate that a November 23, 1992, SIP revision from Florida was approved on October 20, 1994 (59 FR 52916). However, the November 23, 1992, SIP did not include a revision to incorporate the rule entitled "Synthetic Organic Fiber Production," 62–296.413 into the SIP. On December 21, 1994, and on April 15, 1996, the State provided submissions which included miscellaneous revisions and the recodification of the Florida Administrative Code (F.A.C.). F.A.C. 62–296.413 was part of Florida's recodification and was included in these State submittals among other revisions; however, as mentioned above, rule 62–296.413 was never officially submitted for incorporation into the SIP. When EPA took action on June 16, 1999 (64 FR 32346) to approve the recodification and miscellaneous

revisions and also to revise the format of 40 CFR part 52 for materials submitted by Florida that are incorporated by reference (IBR) into the SIP, EPA inadvertently incorporated rule 62–296.413 into the regulatory text.

**II. Analysis of State Rule and Clean Air Act (CAA or Act) Requirements**

The rule entitled "Synthetic Organic Fiber Production," 62–296.413, was originally numbered subsection 17–2.600(13), and was adopted with a state effective date of July 9, 1989, for the sole purpose of controlling acrylonitrile emissions from synthetic organic fiber production facilities in northwest Florida. The rule was only concerned with emissions of toxic air pollutants and not attainment or maintenance of any NAAQS. The rule was in an April 15, 1996, SIP submission along with all other rules that had been simultaneously amended. However, it was not submitted for EPA's approval and incorporation into the SIP. EPA's approval of this provision into the Florida SIP was in error, and EPA is, therefore, proposing to remove the provision from the approved SIP under the authority of section 110(k)(6) of the Act.

Section 110(k)(6) of the Act provides that, whenever the Administrator determines that the Administrator's action approving, disapproving, or promulgating any plan or plan revision was in error, the Administrator may in the same manner as the approval, disapproval or promulgation revise such action as appropriate without requiring further submission from the State. Such determination and the basis thereof must be provided to the state and public.

**III. Proposed Action**

For the reasons stated above in, EPA has found that its prior approval of F.A.C. 62–296.413 into the SIP was in error. Consequently, in order to correct this error, EPA is proposing to remove 62–296.413, from the approved Florida SIP pursuant to section 110(k)(6) of the Act and to codify this deletion by revising the appropriate paragraph under 40 CFR part 52, subpart K, Section 52.520 (Identification of Plan).

**IV. Statutory and Executive Order Reviews**

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of

the CAA. Accordingly, this proposed action merely proposes to remove a State rule from the SIP that was erroneously approved by EPA. This action does not impose additional requirements beyond those imposed by State law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
  - Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
  - Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
  - Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
  - Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
  - Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
  - Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
  - Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
  - Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).
- In addition, this proposed rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the State, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.
