Food and Nutrition Service

National Advisory Council on Maternal, Infant and Fetal Nutrition; Notice of Meeting

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice of meeting.

DATES: Date and Time: July 23–25, 2013, 9:00 a.m.–5:30 p.m.

Place: The meeting will be held at the Virginian Suites, 1500 Arlington Boulevard, Arlington, Virginia 22209.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Maternal, Infant, and Fetal Nutrition will meet to continue its study of the Special Supplemental Nutrition Program for Women, Infants and Children (WIC), and the Commodity Supplemental Food Program (CSFP). The agenda will include updates and a discussion of Breastfeeding Promotion and Support activities, the WIC food packages, WIC funding, Electronic Benefits Transfer, CSFP initiatives and current research studies.

Status: Meetings of the National Advisory Council on Maternal, Infant and Fetal Nutrition are open to the public. Members of the public may participate, as time permits. Members of the public may file written statements with the contact person named below before or after the meeting.

Contact Person For Additional Information: Anne Bartholomew, Supplemental Food Programs Division, Food and Nutrition Service, Department of Agriculture, (703) 305–2746. If members of the public need special accommodations, please notify Anita Cunningham by July 17, 2013, at (703) 305–0986, or email at Anita.Cunningham@fns.usda.gov.

Yvette S. Jackson,
Acting Administrator, Food and Nutrition Service.

Forest Service

Bitterroot National Forest, Darby Ranger District, Como Forest Health Project

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The USDA Forest Service, Bitterroot National Forest will prepare an environmental impact statement (EIS) to document and disclose the effects analysis of the proposed Como Forest Health Project (Como FHP). The Como FHP covers approximately 5,640 acres of national forest land between Lake Como and Lost Horse Roads, about XX miles northwest of Darby in Ravalli County, Montana. The purpose of the Como FHP is to (1) reduce potential mortality of large diameter ponderosa pine caused by increasing mountain pine beetle populations; (2) reduce fuel loads and maintain the historic fire return interval; (3) improve forest resilience to native insects and diseases, and (4) maintain the visual integrity of the larger Lake Como Recreation Area. Mountain pine beetle populations are increasing across the Bitterroot National Forest and in this popular recreation area. Decreasing forest density and maintaining the historic fire return interval would preserve the large diameter ponderosa pine characteristic of this forest type, improve general forest resilience to natural disturbances (native insects, diseases, and fire), and maintain the aesthetics of the larger recreation area. The Como project area is in and adjacent to the popular Lake Como recreation area, visual integrity standards would be a focus of project design during and after treatments.

Proposed Action

The Darby District Ranger on the Bitterroot National Forest proposes to treat 5,190 acres of forest in the 5,640 acre Como Forest Health project area. The Como Forest Health project area lies between Lake Como Road and Lost Horse Road, about three miles northwest of Darby, Montana (R22W,T4N, Sec. 13, 24, 25, 36; R21W,T4N, Sec. 17–21, 28–31). Treatments include commercial timber harvest on 1,860 acres, small tree thinning on 330 acres, and low to moderate severity prescribed fires on about 3,000 acres.

To support timber harvest, three sections of road totaling 0.8 mile would need to be constructed and added to the National Forest System of Roads. These road sections are needed now and in the future to access Unit 41 and units in a recent acquisition to the forest. In addition to the new system road segments, the use of 2.3 miles of temporary road and 3.5 miles of tracked line machine trail would be needed to yard timber from the cutting units. The new system road would be closed, and the temporary road and tracked line machine trail would be obliterated following harvest. Another 0.5 mile of forest road would be converted to a non-motorized trail. Approximately six miles of undetermined roads exist in the
