residential condensing clothes dryer pursuant to this test procedure.

**Dates**

This Decision and Order is effective June 8, 2011.

**Supplementary Information**

In accordance with Title 10 of the Code of Federal Regulations (10 CFR), Section 430.27(f), DOE gives notice of the issuance of its decision and order as set forth below. The decision and order grants BSH a waiver from the applicable residential clothes dryer test procedure at 10 CFR Part 430 subpart B, appendix D, for the two models of condensing clothes dryer specified in its petition.

ii. Excerpts from previous BSH petition for waiver

a. DOE’s existing test procedure for clothes dryers requires the use of an exhaust restrictor to simulate the backpressure effects of a vent tube in an installed condition. And the test procedure does not provide any definition or mention of condenser clothes dryers. Since BSH’s condenser clothes dryers do not have an exhaust vent and the DOE test procedure does not provide any definition or mention of condenser clothes dryers, the products cannot be tested in accordance with the test procedure. Thus, the test procedure does not apply to them. Consequently, the DOE energy conservation standard for clothes dryers does not apply to BSH’s condenser clothes dryers. Furthermore, the FTC does not have a labeling program for clothes dryers, therefore, Miele is not required to test its condenser clothes dryers."

d. The basic purpose of the Energy Policy and Conservation Act, as amended by the National Appliance Energy Conservation Act, is to foster purchase of energy-efficient appliances, not hinder such purchases. The BSH condenser clothes dryer makes a dryer available to households where for physical, structural reasons a vented dryer could otherwise not be installed. BSH condenser clothes dryers thus offer benefits in the public interest. To encourage and foster the availability of these products is in the public interest. Standards programs should not be used as a means to block innovative, improved designs. DOE’s rules thus should accommodate and encourage—not act to block—such a product.

e. Granting the interim waiver and waiver would also eliminate a non-tariff trade barrier. In addition, grant of relief would help enhance economic development and employment, including not only BSH’s operations in California, North Carolina, and Tennessee, but also at major national retailers and regional dealers that carry BSH products. Furthermore, continued employment creation and ongoing investments in its marketing, sales and servicing activities will be fostered by approval of the interim waiver. Conversely, denial of the requested relief would harm the company and would be anticompetitive.
