This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

**DATES:** Additional comments may be submitted on or before July 22, 2013.

**Abstract:** RadNet is a national network of stations collecting sampling media that include air, precipitation, drinking water, and milk. Samples are sent to EPA’s National Air and Radiation Environmental Laboratory (NAREL) in Montgomery, Alabama, where they are analyzed for radioactivity. RadNet provides emergency response/homeland security and ambient monitoring information on levels of environmental radiation across the nation. All stations, usually operated by state and local personnel, participate in RadNet voluntarily. Station operators complete information forms that accompany the samples. The forms request descriptive information pertaining to sample location, e.g., sample type, sample location, length of sampling period, and volume represented.

#### Form Numbers:

- 5900-23 RadNet Equipment and Supply Request Form.
- 5900-24 RadNet Air Particulate Sample Report.
- 5900-27 RadNet Precipitation Report.
- 5900-28 RadNet Pasteurized Milk Report.
- 5900-29 RadNet Drinking Water Report.
- 5900-30 Radnet Legacy Air Sample.

#### Respondents/affected entities:

Volunteer collectors of milk, air, precipitation, and drinking water samples to support EPA’s national environmental radiation monitoring network known as RadNet.

**Respondent’s obligation to respond:** Voluntary.

**Estimated number of respondents:** 302 (total).

**Frequency of response:** Frequency varies according to medium being sampled: milk, quarterly; drinking water, quarterly; rain (precipitation), as events occur; and air, twice weekly.

**Total estimated burden:** 8243 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$299,913 (per year), which includes no annualized capital or operation & maintenance costs.

*Changes in the Estimates:* There is a decrease of 467 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is a result of improved technology that reduces manual calculations for the real-time air monitors and allows some operations to be performed by EPA personnel at NAREL rather than requiring respondent time.

At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

**Abstract:** EPA's Significant New Alternatives Policy (SNAP) program implements Section 612 of the 1990 Clean Air Act (CAA) Amendments

which authorized the Agency to establish regulatory requirements to ensure that ozone-depleting substances (ODS) are replaced by alternatives that reduce overall risks to human health and the environment, and to promote an expedited transition to safe substitutes. To promote this transition, CAA specified that EPA establish an information clearinghouse of available alternatives, and coordinate with other Federal agencies and the public on research, procurement practices, and information and technology transfers.

Since the program's inception in 1994, SNAP has reviewed over 400 new chemicals and alternative manufacturing processes for a wide range of consumer, industrial, space exploration, and national security applications. Roughly 90% of alternatives submitted to EPA for review have been listed as acceptable for a specific use, typically with some condition or limit to minimize risks to human health and the environment.

Regulations promulgated under SNAP require that Motor Vehicle Air Conditioners (MVACs) retrofitted to use a SNAP substitute refrigerant include basic information on a label to be affixed to the air conditioner. The label includes the name of the substitute refrigerant, when and by whom the retrofit was performed, environmental and safety information about the substitute refrigerant, and other information. This information is needed so that subsequent technicians working on the MVAC system will be able to service the equipment properly, decreasing the likelihood of significant refrigerant cross-contamination and potential failure of air conditioning systems and recovery/recycling equipment.

**Form Numbers:** EPA ICR No. 1774.05, OMB Control No. 2060-0450.

**Respondents/affected entities:** Entities potentially affected by this action are new and used car dealers, gas service stations, top and body repair shops, general automotive repair shops, automotive repair shops not elsewhere classified, including air conditioning and radiator specialty shops.

**Respondent's obligation to respond:** Mandatory under 40 CFR 82.180.

**Estimated number of respondents:** 294 (total).

**Frequency of response:** Once per retrofit of a motor vehicle air conditioner.

**Total estimated burden:** 8 hours (per year). Burden is defined as 5 CFR 1320.3(b).

**Total estimated cost:** \$580 (per year), includes \$10 (per year) annualized
