SUPPLEMENTARY INFORMATION:

Title: Regulations for Voluntary Grading of Poultry Products and Rabbit Products—7 CFR Part 70.

OMB Number: 0581-0127.

Expiration Date of Approval: December 31, 2013.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: The Agricultural Marketing Act of 1946 (AMA) (7 U.S.C. 1621 et seq.) directs and authorizes the United States Department of Agriculture (USDA) to develop standards of quality, grades, grading programs, and services which facilitate trading of agricultural products, assure consumers of quality products that are graded and identified under USDA programs. To provide programs and services, section 203(h) of the AMA (7 U.S.C. 1622(h)) directs and authorizes the Secretary of Agriculture to inspect, certify, and identify the grade, class, quality, quantity, and condition of agricultural products under such rules and regulations as the Secretary may prescribe, including assessment and collection of fees for the cost of service. The regulations in 7 CFR Part 70 provides a voluntary program for grading poultry and rabbit products on the basis of U.S. standards and grades. AMS also provides other types of voluntary services under the regulations, e.g., contract and specification acceptance services and certification of quantity. All of the voluntary grading services are available on a resident basis or lot-fee basis. Respondents may request resident service on a continuous or temporary basis. The service is paid for by the user (user-fee). Because this is a voluntary program, respondents need to request or apply for the specific service they wish, and in doing so, they provide information. Since the AMA requires that the cost of service be assessed and collected, information is collected to establish the Agency's cost. The information collection requirements in this request are essential to carry out the

intent of the AMA, to provide the respondents the type of service they request, and to administer the program. The information collected is used only by authorized representatives of the USDA (AMS, Livestock, Poultry and Seed Program's national staff; regional directors and their staffs; Federal-State supervisors and their staffs; and resident Federal-State graders, which includes State agencies). The information is used to administer and conduct grading services requested by respondents. The Agency is the primary user of the information. Information is also used by each authorized State agency that has a cooperative agreement with AMS.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 0.0833 hours per response.

Respondents: State or local governments, businesses or other for profits, Federal agencies or employees, and small businesses or organizations.

Estimated Number of Respondents: 690 respondents.

Estimated Total Annual Responses: 24,053.50 responses.

Estimated Number of Responses per Respondent: 34.86 responses per respondent.

Estimated Total Annual Burden on Respondents: 2,004 hours.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Dated: June 14, 2013.

Rex A. Barnes,

Associate Administrator, Agricultural Marketing Service.

SUPPLEMENTARY INFORMATION:

Background

The World Trade Organization (WTO) was established on January 1, 1995, as the common international institutional framework for the conduct of trade relations among its members in matters related to the Uruguay Round Trade Agreements. The WTO is the successor organization to the General Agreement on Tariffs and Trade (GATT). U.S. membership in the WTO was approved and the Uruguay Round Agreements Act was signed into law by the President on December 8, 1994. The Uruguay Round Agreements became effective, with respect to the United States, on January 1, 1995. Pursuant to section 491 of the Trade Agreements Act of 1979, as amended, the President is required to designate an agency to be "responsible for informing the public of the sanitary and phytosanitary (SPS) standard-setting activities of each international standard-setting organization." The main organizations are Codex, the World Organisation for Animal Health, and the International Plant Protection

Convention. The President, pursuant to Proclamation No. 6780 of March 23, 1995 (60 FR 15845), designated the U.S. Department of Agriculture as the agency responsible for informing the public of the SPS standard-setting activities of each international standard-setting organization. The Secretary of Agriculture has delegated to the Office of Food Safety the responsibility to inform the public of the SPS standard-setting activities of Codex. The Office of Food Safety has, in turn, assigned the responsibility for informing the public of the SPS standard-setting activities of Codex to the U.S. Codex Office.

Codex was created in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the principal international organization for establishing standards for food. Through adoption of food standards, codes of practice, and other guidelines developed by its committees and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers, ensure fair practices in the food trade, and promote coordination of food standards work undertaken by international governmental and nongovernmental organizations. In the United States, U.S. Codex activities are managed and carried out by the United States Department of Agriculture (USDA); the Food and Drug Administration (FDA), Department of Health and Human Services (HHS); the National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC); and the Environmental Protection Agency (EPA).

As the agency responsible for informing the public of the SPS standard-setting activities of Codex, the Office of Food Safety publishes this notice in the **Federal Register** annually. Attachment 1 (Sanitary and Phytosanitary Activities of Codex) sets forth the following information:

1. The SPS standards under consideration or planned for consideration; and
2. For each SPS standard specified:
 - a. A description of the consideration or planned consideration of the standard;
 - b. Whether the United States is participating or plans to participate in the consideration of the standard;
 - c. The agenda for United States participation, if any; and
 - d. The agency responsible for representing the United States with respect to the standard.
