Fisheries of the Northeastern United States; Recreational Management Measures for the Summer Flounder, Scup, and Black Sea Bass Fisheries; Fishing Year 2013

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS is implementing management measures for the 2013 summer flounder, scup, and black sea bass recreational fisheries. This rule also implements an increase in the 2013 and 2014 black sea bass specifications, consistent with a new acceptable biological catch recommendation. The implementing regulations for these fisheries require NMFS to publish recreational measures for the fishing year. The intent of these measures is to prevent overfishing of the summer flounder, scup, and black sea bass resources.

DATES: Effective June 20, 2013.

ADDRESSES: Copies of the Supplemental Environmental Assessment (SEA) for the 2013 recreational management measures document, including the Supplemental Environmental Assessment, Regulatory Impact Review, and Initial Regulatory Flexibility Analysis (SEA/RIR/IRFA) and other supporting documents for the recreational management measures are available from Dr. Christopher M. Moore, Executive Director, Mid-Atlantic Fishery Management Council, Suite 201, 800 North State Street, Dover, DE 19901. These documents are also accessible via the Internet at <http://www.nero.noaa.gov>.

SUPPLEMENTARY INFORMATION:

General Background

The summer flounder, scup, and black sea bass fisheries are managed cooperatively by the Atlantic States Marine Fisheries Commission (Commission) and the Mid-Atlantic Fishery Management Council (Council), in consultation with the New England and South Atlantic Fishery Management Councils. The FMP and its implementing regulations, which are found at 50 CFR part 648, subparts A (general provisions), G (summer flounder), H (scup), and I (black sea bass), describe the process for specifying annual recreational management measures that apply in the Exclusive Economic Zone (EEZ). The states from North Carolina to Maine manage these fisheries within 3 nautical miles of their coasts, under the Commission’s plan for summer flounder, scup, and black sea bass. The Federal regulations govern

fishing activity in the EEZ, as well as vessels possessing Federal permits for summer flounder, scup, and/or black sea bass, regardless of where they fish.

A proposed rule to implement the 2013 Federal recreational measures for the summer flounder, scup, and black sea bass recreational fisheries was published on April 29, 2013 (78 FR 25052). Additional background and information is provided in the preamble to the proposed rule and is not repeated here.

2013 and 2014 Black Sea Bass Specifications and 2013 Recreational Management Measures

In this rule, NMFS is implementing management measures for the 2013 summer flounder, scup, and black sea bass recreational fisheries. This rule also implements an increase in the 2013 and 2014 black sea bass specifications, consistent with a new acceptable biological catch (ABC) recommendation. All minimum fish sizes discussed hereafter are total length measurements of the fish, i.e., the straight-line distance from the tip of the snout to the end of the tail while the fish is lying on its side. For black sea bass, total length measurement does not include the caudal fin tendril. All possession limits discussed below are per person.

Black Sea Bass Specifications

The process for establishing specifications was summarized in the proposed rule and is not repeated here. At its December 2012 meeting, the Council requested that the Scientific and Statistical Committee (SSC) revisit the 2013 black sea bass specifications and make a recommendation for the 2014 fishing year. On January 23, 2013, the SSC met to reconsider these specifications and recommended an increase in the specifications for both the 2013 and 2014 fishing years. The SSC revised its recommendation for the 2013 and 2014 black sea bass ABC to 5.5 million lb (2,495 mt). The Council voted at its February 2013 meeting to recommend that the new ABC be implemented in conjunction with the recreational management measures. The following table provides the initial specifications for black sea bass for 2013 that were established in the specifications final rule (December 31, 2012; 77 FR 76942) and the revised specifications for 2013 and 2014 that are implemented in this rule.
