Title: NESHAP for Commercial Ethylene Oxide Sterilization and Fumigation Operations (Renewal).

ICR Numbers: EPA ICR Number 1666.09, OMB Control Number 2060-0283.

ICR Status: This ICR is scheduled to expire on June 30, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the

NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart O.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Respondents/Affected Entities: Owners or operator of commercial ethylene oxide sterilization and fumigation operations.

Estimated Number of Respondents: 122. "Burden" is defined at 5 VFR 1320.3(b).

Frequency of Response: Initially, occasionally and semiannually.

Estimated Total Annual Hour Burden: 8,887.

Estimated Total Annual Cost: \$1,524,913, which includes \$860,413 in labor costs, \$65,000 in capital/startup costs, and \$599,500 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an adjustment increase in burden for both the respondents and the Agency from the most recently approved ICR. This is not due to any program changes. The increase is due to an update in labor rates and an increase of three respondents subject to the regulation since the last ICR. This results in an increase in respondent and Agency labor hours, costs, and total O&M costs.

Acting Director, Collection Strategies
Division.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart CCCC. Owners or operators of the affected facilities must submit an initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Owners or operators of commercial and industrial solid waste incineration units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart CCCC).

Estimated number of respondents: 30 (total).

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 5,965 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$959,788 (per year), includes \$382,200 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase in the Agency costs from the most recently approved ICR due to an increase in labor rates. This ICR uses updated labor rates in calculating all burden costs.

Additionally, when compared to the previous ICR, there is a decrease in respondent burden and an increase in the total O&M costs. The previous ICR included contractor labor costs associated with initial emissions testing and annual stack testing under Table 1, Annual Respondent Burden and Cost. Since the contractor labor costs apply solely to capital/startup and O&M activities, we have revised the ICR to reflect contractor labor costs under their respective capital/startup and O&M activities, and also have updated the associated contractor labor burden rate.

There is also a decrease in capital/startup costs in this ICR as new sources will become subject to the 2013 standards and will not have burden
