### Food Safety and Inspection Service

[Docket No. FSIS-2011-0033]

#### Availability of Guidance: Establishments Guidance for the Selection of a Commercial or Private Microbiological Testing Laboratory

**AGENCY:** Food Safety and Inspection Service, USDA.

**ACTION:** Notice of availability.

**SUMMARY:** The Food Safety and Inspection Service (FSIS) is announcing the availability of final guidance for federally inspected establishments in the selection of commercial and private microbiological testing laboratories. FSIS has posted this policy guidance on its Web page <http://www.fsis.usda.gov/wps/portal/fsis/topics/regulatory->

*compliance/compliance-guides-index.*

FSIS encourages establishments that prepare meat, poultry, or processed egg products to consider the criteria in the guidance in selecting commercial or private microbiological testing laboratories and in determining the laboratories' capability to produce accurate and reliable results. Regulated establishments are required to introduce into commerce only meat, poultry, or processed egg products that are safe and not adulterated or misbranded. Establishments that select laboratories that do not apply appropriate testing methods or maintain effective Quality Control or Quality Assurance (QC/QA) practices may not receive reliable or useful test results and thus run the risk of not being aware that the food that they have produced is unsafe.

**DATES:** The guidance is effective August 26, 2013.

**SUPPLEMENTARY INFORMATION:**

#### Background

In a **Federal Register** notice published March 8, 2012 (77 FR 13999), FSIS made available its "Establishment Guidance for the Selection of a Commercial or Private Microbiological Testing Laboratory" and requested comment on it. As FSIS explained in the 2012 **Federal Register** notice, this guidance document provides establishments that prepare meat, poultry, and processed egg products with criteria for selecting a commercial or private laboratory to analyze their samples. Regulated establishments are ultimately responsible for the testing methods and practices that the laboratory employs on the establishments' behalf.

An FSIS-regulated establishment may perform microbiological testing for various reasons, including, but not limited to: Fulfilling regulatory requirements; performing on-going verification of the establishment's Hazard Analysis and Critical Control Point (HACCP) plan; supporting decisions made in the establishment's hazard analysis; evaluating the effectiveness of the establishment's sanitation program; and complying with purchase specifications or requirements.
