and HB2. (Bulb manufacturers tend to use corresponding ANSI trade numbers such as 9004, as well.) Each type of replaceable light source is unique in dimensional and electrical design so as not to be interchangeable with another type of replaceable light source. Every replaceable light source must be designed to conform to the marking, dimensional, and electrical specifications applicable to the type of replaceable light source that it replaces. For instance, the replacement light source must have the same (within a tolerance) luminous flux (a measure of light output) as the light source it replaces. When the light source is mounted in a headlamp for that type of light source, the lamp must discharge light in specified directions and intensity levels, to satisfy the same requirements of the standard. If it were otherwise, among other things, the wrong light sources could be placed in headlamps and the light output would be incorrect or improper.

NHTSA's Analyses: Panda Power argues that the noncompliance is inconsequential to motor vehicle safety, primarily because the kits were originally intended for sale to the agricultural community and to be placed on tractors and combines, or for off-road vehicles, or for exhibition purposes. NHTSA reviewed the Office Activity file for the original investigation with Panda Power. Excerpts from Panda Powers Web site, dated June 24, 2009, clearly indicate that these items are intended for motor vehicle headlamps. The site displays pictures of numerous passenger cars (e.g., Mercedes Benz, Lexus, Toyota, and Mitsubishi), references other motor vehicles (e.g., BMW), provides a link to Sylvania's replacement bulb guide for motor vehicles, and provides pictures of beam patterns as seen on roadways. It also provides troubleshooting tips for installations on motor vehicles containing daytime running lamps and how to stop lamp flicker when hitting bumps in the road. Because of this information, we find that Panda Powers claim that they sold these items for non-road use to be disingenuous.

Panda Power further states that its products are likely no longer functioning. Regardless of the quality of Panda Power's products, the Motor Vehicle Safety Act requires that manufacturers (defined to include importers) of noncompliant equipment must notify purchasers of the noncompliance (pursuant to 49 U.S.C. 30119) and provide a free remedy (pursuant to 49 U.S.C. 30120). If a free remedy cannot be provided then repurchase should be initiated in a reasonable time frame.

Panda Power also argues that because it stopped selling the HID conversion kits, it should not be required to conduct a recall and remedy campaign. Among other things, 49 U.S.C. 30112(a) prohibits the importation and sale of noncompliant equipment and Panda Power is compelled to discontinue this practice to prevent further violations of 49 U.S.C. 30112(a), and not as a waiver from the recall and remedy requirements. NHTSA's Response to Comments: NHTSA received comments from two parties. Both of these parties recommend denying Panda Power's petition.

Daniel J. Stern of the Daniel Stern Lighting Consultancy provided a substantive, practical, and technical argument regarding the effects on headlamp performance when replacing standardized headlamp replaceable light sources with HID conversion kits. Mr. Stern stated that installing HID light sources into headlamps that were designed to accept tungsten-halogen light sources would create an enormous increase in glare light directed towards other road users, and reduce the driver's distance visual acuity due to increased foreground illumination. Mr. Stern also stated that the noncompliance created by Panda Power's HID kits appear to be systemic, pervasive, and substantial, creating a significant safety risk to the motoring public.

Michael F. Turpen, a private citizen, examined archives of Panda Power's Web site using www.waybackmachine.org (a Web site maintained by the Internet Archive, a 501(3)(c) non-profit corporation). He referenced archived pages of Panda Power's Web site that showed its HID Conversion kits installed on motor vehicles, photos of headlamp output on streets in residential neighborhoods, and banners that indicate "offering HID kits for any vehicle."

NHTSA Decision: In consideration of the foregoing, NHTSA has determined that certain model year (MY) 2007 through 2013 GM trucks and multipurpose passenger vehicles (MPVs) manufactured from June 19, 2006, through December 6, 2012 do not fully comply with paragraph S4.3 of Federal Motor Vehicle Safety Standard (FMVSS) No. 110, Tire Selection and Rims for Motor Vehicles with a GVWR of 4,536 Kilograms or less. GM has filed an appropriate report dated December 19, 2012, pursuant to 49 CFR Part 573, Defect and Noncompliance Responsibility and Reports. Pursuant to 49 U.S.C. 30118(d) and 30120(h) (see implementing rule at 49 CFR Part 556), GM submitted a petition for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of GM's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Vehicles Involved: Affected are approximately 5,690: MY 2007 through 2013 Chevrolet Silverado trucks, Suburban MPVs and Tahoe MPVs; MY 2007 through 2013 GMC Sierra trucks; MY 2012 GMC Yukon MPVs; and MY 2007, 2009, 2011, 2012 and 2013 Yukon XL MPV's. The affected vehicles were...
manufactured from June 19, 2006 through December 6, 2012.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, these provisions only apply to the 5,690 2 vehicles that GM no longer controlled them. It determined that the noncompliance existed.

RULE TEXT: Paragraph S4.3 of FMVSS No. 110 requires in pertinent part:

S4.3 Placard. Each vehicle, except for a trailer or incomplete vehicle, shall show the information specified in S4.3 (a) through (g), and may show, at the manufacturer’s option, the information specified in S4.3 (h) and (i), on a placard affixed to the driver’s side B-pillar. In each vehicle without a driver’s side B-pillar and with two doors on the driver’s side of the vehicle opening in opposite directions, the placard shall be affixed on the forward edge of the rear side door. If the above locations do not permit the affixing of a placard that is legible, visible and prominent, the placard shall be permanently affixed to the rear edge of the driver’s side door. If this location does not permit the affixing of a placard that is legible, visible and prominent, the placard shall be affixed to the inward facing surface of the vehicle next to the driver’s seating position. This information shall be in the English language and conform in color and format, not including the border surrounding the entire placard, as shown in the example set forth in Figure 1 in this standard. At the manufacturer’s option, the information specified in S4.3 (c), (d), and, as appropriate, (h) and (i) may be shown, alternatively to being showed on the placard, on a tire inflation pressure label which must conform in color and format, not including the border surrounding the entire label, as shown in the example set forth in Figure 2 in this standard.

The label shall be permanently affixed and proximate to the placard required by this paragraph. The information specified in S4.3 (e) shall be shown on both the vehicle placard and on the tire inflation pressure label (if such a label is affixed to provide the information specified in S4.3 (c), (d), and, as appropriate, (h) and (i)) may be shown in the format and color scheme set forth in Figures 1 and 2. If the vehicle is a motor home and is equipped with a propane supply, the weight of full propane tanks must be included in the vehicle’s unloaded vehicle weight.

NHTSA notes that the vehicle's seating capacity, it will be readily apparent that the front row seating capacity is 2 and not 3.

1. The vehicle capacity weight (expressed as a combined weight of occupants and cargo) on the placard is correct. The seating capacity error has no impact on the vehicle capacity weight, and therefore, there is no risk of vehicle overloading.

2. All information required for maintaining and/or replacing the front and rear tires is correct on the tire information placard of the subject vehicles.

3. All information required for maintaining and/or replacing the front and rear tires is correct on the tire information placard of the subject vehicle.

4. All other applicable requirements of FMVSS No. 110 have been met.

5. GM is not aware of any customer complaints, incidents or injuries related to the incorrect seating capacity on the subject tire information placards.

GM additionally informed NHTSA that it has corrected the noncompliance so that all future production vehicles will fully comply with FMVSS No. 110.

In summarization, GM believes that the described noncompliance of its vehicles is inconsequential to motor vehicle safety, and that its petition, to exempt from providing recall notification of noncompliance as required by 49 U.S.C. 30118 and remedying the recall noncompliance as required by 49 U.S.C. 30120 should be granted.

Comments: Interested persons are invited to submit written data, views, and arguments on this petition.

Comments must refer to the docket and notice number cited at the beginning of this notice and be submitted by any of the following methods:

b. By hand delivery to U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590. The Docket Section is open on weekdays from 10 a.m. to 5 p.m. except Federal Holidays.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that your comments were received, please enclose a stamped, self-addressed postcard with your comments. Note that all comments received will be posted without change to http://

2 GM’s petition, which was filed under 49 CFR Part 556, requests an agency decision to exempt GM as a motor vehicle manufacturer from the notification and recall responsibilities of 49 CFR Part 573 for the affected vehicles. However, a decision on this petition cannot relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, installation or delivery for introduction into interstate commerce of the noncompliant motor vehicles under their control after GM notified them that the subject noncompliance existed.

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2013–0084]

Pipeline Safety: Information Collection Activities, Revisions to Incident and Annual Reports for Gas Pipeline Operators

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, PHMSA invites comments on an information collection under Office of Management and Budget (OMB) Control No. 2137–0522, titled “Incident and Annual Reports for Gas Pipeline Operators.” PHMSA is preparing to revise seven forms which are included in this information collection. These forms include: PHMSA F 7100.1 Incident Report—Gas Distribution System; PHMSA F 7100.1–2 Mechanical Fitting Failure Report Form for Calendar Year 20— for Distribution Operators; PHMSA F 7100.2 Incident Report—Natural and Other Gas Transmission and Gathering Pipeline Systems; PHMSA F 7100.2–1 Annual Report for Calendar Year 20— Natural and Other Gas Transmission and Gathering Pipeline Systems; PHMSA F 7100.3 Incident Report—Liquefied Natural Gas Facilities; and PHMSA F 7100.3–1 Annual Report for Calendar Year 20— Liquefied Natural Gas Facilities. In accordance with the Paperwork Reduction Act of 1995, PHMSA invites comments on the proposed revisions to these forms and instructions.

DATES: Interested persons are invited to submit comments on or before August 26, 2013.

ADDRESSES: Comments may be submitted in the following ways:

E-Gov Web site: http://www.regulations.gov. This site allows the public to enter comments on any Federal Register notice issued by any agency.

Mail: Docket Management Facility; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., West Building, Room W12–140, Washington, DC 20590–0001.

Hand Delivery: Room W12–140 on the ground level of DOT, West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.

Instructions: Identify the docket number, PHMSA–2013–0084, at the beginning of your comments. Note that all comments received will be posted without change to http://www.regulations.gov, including any personal information provided. You should know that anyone is able to search the electronic form of all comments received into any of our docket and revising the instructions.

Changing system types, removing a type, adding a commodity type, removing a commodity type, changing system types, removing a commodity type, changing system types, removing a commodity type, and revising the instructions. Background for these topics is as follows:

1. Adding Pipe Material Type of Reconditioned Cast Iron

PHMSA recognizes that reconditioned cast iron pipe may be used in gas distribution systems. This new pipe material type will be added as an option in part C4.

2. Adding Commodity of Landfill Gas

PHMSA recognizes that gas distribution pipelines may transport gas produced in landfills. In order to differentiate this type of gas, the
