generally not required to respond to an information collection, unless it is
approved by the OMB under the PRA and displays a currently valid OMB
Control Number. In addition, notwithstanding any other provisions of
law, no person shall generally be subject to penalty for failing to comply with
a collection of information that does not display a valid Control Number. See 5

renewal, and the current approval for this collection is scheduled to expire on
July 31, 2013. The DOL seeks to extend PRA authorization for this information
collection for three (3) more years,
without any change to existing
requirements. It should also be noted that existing information collection
requirements submitted to the OMB receive a month-to-month extension
while they undergo review.

SUPPLEMENTARY INFORMATION:
I. Background
The ETA 207 Report, Nonmonetary Determination Activities, contains state
data on the number and types of issues that are adjudicated when
unemployment insurance (UI) claims are filed. It also has data on the number of
disqualifications that are issued for reasons associated with a claimant’s
separation from employment and reasons related to a claimant’s
continuing eligibility for benefits. These data are used by the Office of
Unemployment Insurance (OUI) to determine workload counts for allocation of administrative funds, to analyze the ratio of disqualifications to determinations, and to examine and evaluate the program effect of nonmonetary activities.

II. Desired Focus of Comments

Currently, the Employment and Training Administration is soliciting comments concerning the proposed extension collection of the ETA 207, Nonmonetary Determinations Activities Report. Comments are requested to:

• Evaluate whether the proposed collection of information is necessary to assess performance of the nonmonetary determination function, including whether the information will have practical utility;

• evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• enhance the quality, utility, and clarity of the information to be collected; and

• minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

The continued collection of the information contained on the ETA 207 report is necessary to enable the OUI to continue evaluating state performance in the nonmonetary determination area and to continue using the data as a key input to the administrative funding process.
