

Regulatory Agenda estimates that the SBREFA Panel Review will be held in October 2013.

Summary Evaluation

OSHA has initiated a rulemaking to issue a combustible dust standard and continues to undertake noteworthy and important regulatory enforcement and educational efforts to prevent and control combustible dust hazards in the workplace. The federal rulemaking process is complex; however, a combustible dust general industry standard is urgently needed to prevent future fires and explosions from claiming the lives of American workers. In addition, more than six years have passed since the CSB first issued a recommendation for this standard. Therefore, staff propose that the Board vote to designate all four recommendations with the status: "Open-Unacceptable Response."

No factual analyses, conclusions, or findings presented by staff should be considered final. Only after the Board has considered the staff presentations and voted to approve a change in status of the recommendation should that status be considered final.

Additional Information

The meeting will be free and open to the public. If you require a translator or interpreter, please notify the individual listed below as the "Contact Person for Further Information," at least five business days prior to the meeting.

The CSB is an independent federal agency charged with investigating accidents and hazards that result, or may result, in the catastrophic release of extremely hazardous substances. The agency's Board Members are appointed by the President and confirmed by the Senate. CSB investigations look into all aspects of chemical accidents and hazards, including physical causes such as equipment failure as well as inadequacies in regulations, industry standards, and safety management systems.

PUBLIC COMMENT: Members of the public are invited to make brief statements to the Board at the conclusion of the staff presentations in the morning and afternoon. The time provided for public statements will depend upon the number of people who wish to speak. Speakers should assume that their presentations will be limited to five minutes or less, and may submit written statements for the record.

National Oceanic and Atmospheric Administration

RIN 0648-XC008

Endangered and Threatened Species; Recovery Plans

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability.

SUMMARY: We, NMFS, announce the adoption of an Endangered Species Act (ESA) recovery plan for Lower Columbia River Chinook salmon (*Oncorhynchus tshawytscha*), Lower Columbia coho salmon (*O. kisutch*), and Columbia River chum salmon (*O. keta*) evolutionarily significant units (ESUs) and the Lower Columbia River steelhead (*O. mykiss*) distinct population segment (DPS), all of which are listed as threatened under the ESA. The geographic area covered by the plan is the Lower Columbia River mainstem and tributaries downstream of (and including) the White Salmon River in Washington and the Hood River in Oregon. As required by the ESA, the plan contains objective, measurable delisting criteria, site-specific management actions necessary to achieve the plan's goals, and estimates of the time and costs required to implement recovery actions. The *Endangered Species Act (ESA) Recovery Plan for Lower Columbia River Chinook Salmon, Lower Columbia River Coho Salmon, Columbia River Chum Salmon, and Lower Columbia River Steelhead* (Plan) and our summary of and responses to public comments on the Proposed Plan are now available.

ADDRESSES: Electronic copies of the Plan and a summary of and response to public comments on the Proposed Plan are available on-line at http://www.nwr.noaa.gov/protected_species/salmon_steelhead/recovery_planning_and_implementation/lower_columbia_river/lower_columbia_river_recovery_plan_for_salmon_steelhead.html.
