Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call (404) 639–7570 or send an email to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395–5806. Written comments should be received within 30 days of this notice.

Proposed Project

A Controlled Evaluation of Expect Respect Support Groups (ERSG): Preventing and Interrupting Teen Dating Violence among At-Risk Middle and High School Students (0920–0861, Expiration 8/31/2013)—Extension—National Center for Injury Prevention and Control (NCIPC), Division of Violence Prevention (DVP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The prevalence and consequences of teen dating violence make it a public health concern that requires early and effective prevention. To date, only three prevention strategies—Safe Dates, the Youth Relationships Project, and 4th R—have demonstrated reductions in dating violence behaviors in rigorous, controlled evaluations. In order to protect young people and build an evidence-base of effective prevention strategies, evaluation of additional programs is needed, including those programs currently in the field. The Expect Respect Support Groups (ERSG; provided by SafePlace) program is currently being implemented in the

Austin Independent School District and demonstrated promising results in an uncontrolled program evaluation, suggesting a controlled evaluation is warranted to more rigorously examine program effects.

This extension request is the controlled evaluation of ERSG, which began in September 2010; it has one primary aim and two exploratory aims. The primary aim is to evaluate the effectiveness of ERSG to prevent and reduce teen dating violence and increase healthy conflict resolution skills reported by at-risk male and female middle and high school students compared to at-risk students in control schools who do not receive ERSG. The exploratory aims are: (1) To evaluate whether or not the effectiveness of ERSG is enhanced by the presence of a universal, school-wide prevention programs, and (2) To examine moderators and mediators of targeted and universal teen dating violence interventions, such as biological sex and history of abuse at intake. Completion of this study and examination of the primary and exploratory aims associated with it will help to fill a research gap by adding results to the evidence base regarding whether ERSG is a promising program for reducing the prevalence of teen dating violence and increasing knowledge of healthy relationship skills.

The purpose of this request is to obtain Office of Management and Budget (OMB) approval to extend the data collection for A Controlled Evaluation of Expect Respect Support Groups (ERSG): Preventing and Interrupting Teen Dating Violence among At-Risk Middle and High School Students (OMB No.0920–0861, Expiration 8/31/2013). CDC seeks a three-year approval to continue the ERSG project. The ongoing evaluation employs a quasi-experimental/non-randomized design in which a convenience sample of participants in schools receiving universal and/or targeted prevention services are compared to students in control schools

in which no dating violence prevention services are available. We will recruit 1,800 students (300 per year from intervention schools and 300 per year from control schools) over three waves of data collection. Of the 1,800 students recruited, we anticipate 1,200 will have complete data at the end of the study period. Control schools have been selected that have characteristics (e.g., risk status, socio-economic status) similar to the Austin Independent School District intervention schools.

Survey items collect information about emotional, physical, and sexual peer and dating violence victimization and perpetration, use of healthy relationship skills, relationships characteristics, peer relationships, demographics, and use of other teen dating violence prevention services, social desirability, and attitudes toward dating violence. These measures were developed in collaboration with scientists at the Centers for Disease Control and Prevention and (1) are adapted from validated measures of teen dating violence, and (2) reflect the behaviors of interest and theory of change of Expect Respect. The Reactive Proactive Questionnaire (Raine et al., 2006) has also been included in the instrument packet and will be used to determine if subtype of aggression moderates response to intervention.

Participation in this study is voluntary and intrusions to the participants' sense of privacy will be minimized by only using data collected from students who have agreed for us to do so (through student assent and signed distribution of passive parental consent forms) and having the data coded in such a way to protect subjects' privacy.

Finally, ERSG facilitators will take part in qualitative interviews planned for the middle (December) and end (May) of the second and third years of data collection. The goal of these interviews is to better understand the implementation process for ERSG.

There are no costs to respondents other than their time.

SUPPLEMENTARY INFORMATION:

I. Description of the Matching Program

A. General

The Computer Matching and Privacy Protection Act of 1988 (Public Law (Pub. L.) 101-503), amended the Privacy Act (5 U.S.C. 552a) by describing the manner in which computer matching involving Federal agencies could be performed and adding certain protections for individuals applying for and receiving Federal benefits. Section 7201 of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101-508) further amended the Privacy Act regarding protections for such individuals. The Privacy Act, as amended, regulates the use of computer matching by Federal agencies when records in a system of records are matched with other Federal, state, or local government records. It requires Federal agencies involved in computer matching programs to:

1. Negotiate written agreements with the other agencies participating in the matching programs;
2. Obtain the Data Integrity Board approval of the match agreements;
3. Furnish detailed reports about matching programs to Congress and OMB;

4. Notify applicants and beneficiaries that the records are subject to matching; and,

5. Verify match findings before reducing, suspending, terminating, or denying an individual's benefits or payments.

B. CMS Computer Matches Subject to the Privacy Act

CMS has taken action to ensure that all CMPs that this Agency participates in comply with the requirements of the Privacy Act of 1974, as amended.

Dated: July 6, 2013.
