

○ Are there uniform and recognized differences in the lengths of rental and leasing agreements? Do these lead to special funding considerations for the government?

○ Are there specific differences in other terms and conditions, such as maintenance, warranty, insurance, taxes, storage, and transportation? What are the specific distinctions?

- FAR 7.402(a) and (b) provide circumstances indicating when the purchase or lease method is appropriate. Should rent be added as a third method? If so, when is renting a more appropriate method than purchasing or leasing and in what way would it impact the determination of most effective procurement approach (e.g., cost savings and efficiencies)?

- Does short-term rental offer cost savings and efficiencies unavailable through leasing?

- What additional guidance might be provided at FAR subpart 7.4 to clarify when and how to perform the required analysis?

Dated: July 9, 2013.

William Clark,

Acting Director, Federal Acquisition Policy Division, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Meeting; Subcommittee for Dose Reconstruction Reviews, Advisory Board on Radiation and Worker Health (ABRWH or the Advisory Board), National Institute for Occupational Safety and Health (NIOSH)

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC), announces the following meeting for the aforementioned subcommittee:

Time and Date: 10:00 a.m.–5:00 p.m., Eastern Time, August 7, 2013.

Place: Audio Conference Call via FTS Conferencing. The USA toll-free, dial-in number is 1-866-659-0537, and the pass code is 9933701.

Status: Open to the public, but without an oral public comment period.

Background: The Advisory Board was established under the Energy Employees Occupational Illness Compensation Program Act of 2000, to advise the President on a variety of policy and technical functions required to implement and effectively

manage the new compensation program. Key functions of the Advisory Board include providing advice on the development of probability of causation guidelines that have been promulgated by the Department of Health and Human Services (HHS) as a final rule; advice on methods of dose reconstruction, which have also been promulgated by HHS as a final rule; advice on the scientific validity and quality of dose estimation and reconstruction efforts being performed for purposes of the compensation program; and advice on petitions to add classes of workers to the Special Exposure Cohort.

In December 2000, the President delegated responsibility for funding, staffing, and operating the Advisory Board to HHS, which subsequently delegated this authority to CDC. NIOSH implements this responsibility for CDC. The charter was issued on August 3, 2001, renewed at appropriate intervals, and will expire on August 3, 2013.

Purpose: The Advisory Board is charged with (a) providing advice to the Secretary, HHS, on the development of guidelines under Executive Order 13179; (b) providing advice to the Secretary, HHS, on the scientific validity and quality of dose reconstruction efforts performed for this program; and (c) upon request by the Secretary, HHS, advise the Secretary on whether there is a class of employees at any Department of Energy facility who were exposed to radiation but for whom it is not feasible to estimate their radiation dose, and on whether there is reasonable likelihood that such radiation doses may have endangered the health of members of this class. The Subcommittee for Dose Reconstruction Reviews was established to aid the Advisory Board in carrying out its duty to advise the Secretary, HHS, on dose reconstruction.

Matters To Be Discussed: The agenda for the Subcommittee meeting includes: dose reconstruction program quality management and assurance activities, including current findings from NIOSH internal dose reconstruction blind reviews; and discussion of dose reconstruction cases under review (sets 8-9, and Savannah River Site, Rocky Flats Plant, and Los Alamos National Laboratory cases from sets 10-13).

The agenda is subject to change as priorities dictate.

In the event an individual cannot attend, written comments may be submitted. Any written comments received will be provided at the meeting and should be submitted to the contact person below well in advance of the meeting.
