Question 6b Additional Data Requested

Southern Company Services, Inc. (SCS) requests clarification addressing why the Commission proposes to add a new column in Question 6b titled “Coal (x10³ tons) not delivered by end of contract year.” SCS states that proper contextualization of annual variances between actual deliveries and contract quantities could impact confidential negotiations, and that it is commercially sensitive business information. Further, SCS states that the efficiencies gained by the other revisions proposed by the Commission are outweighed by the addition of this new column. SCS states that if the Commission deems that such inquiry is appropriate for Form 580, that the Commission provide more context around its intent in proposing such an addition.

FERC Response: The proposal to add the new column to Question 6b originated with the Form 580 filers. Their issue is that it is not possible in the current form, to report coal delivered in, for example, 2012 under a 2011 contract. Without the new column, the Commission would have no way of knowing that a delivered coal quantity less than its contract quantity was coal truly not delivered, and that it wasn’t merely a typographical error in the form. Likewise, the Commission would assume all coal reported as delivered, was delivered during the contract year when it may not have been but was reported as delivered because there was no means provided in the form to report that it was not delivered. Not having the information that the column would provide, potentially results in assumptions leading to skewed data calculations. Further, coal contract amounts, delivery amounts, and shortage amounts have been determined by OMB for decades to be public information. In addition, the data requested in the new column are data routinely calculated by the utility and are readily available to enter into the form. Lastly, given the information that the Commission proposes to eliminate from the Form 580 for the 2014 reporting cycle, the reporting burden will not increase by adding this one column.

De Minimis Benchmarks

Pacific Gas and Electric Company (PG&E) requests *de minimis* benchmarks from the Commission so that filers will know whether they are required or not to answer a question in the form without filing for a waiver.

FERC response: In some cases, the Commission has found it unnecessarily burdensome for utilities to answer a particular question based on the information gained from doing so. Not surprisingly, the *de minimis* determination requires a case-specific analysis using a utility-by-utility approach. Any utility that believes that its burden is not worth the information that the Commission would gain is welcome to request a waiver and in doing so provide detailed case-specific information supporting its claim. This has been the procedure used in prior years by the Commission and is approved by OMB.

“Type of Request”

PG&E also requests clarification of the term “Type of Request” stated at page 2 of FERC’s Notice.

FERC response: OMB requires approval/renewal of approvals of all collections of information every three years. The three year period does not refer to the collection frequency, but the period of time beyond which OMB’s approval of a collection of information would expire if not renewed.

Federal Energy Regulatory Commission

[Docket No. CP13–514–000]

Texas Eastern Transmission, LP; Notice of Application

On July 2, 2013, Texas Eastern Transmission, LP (Texas Eastern) filed with the Federal Energy Regulatory Commission (Commission) an application under section 7(b) of the Natural Gas Act and Part 157, Subpart A of Commission regulations for authorization to abandon certain natural gas facilities no longer in service. As described more fully in the Application, Texas Eastern states that it lacks the documentation to confirm the dates these facilities were removed from service or that abandonment authorization was received. Texas Eastern lists more than 750 of such facilities, 550 meter stations and 200 small pipe sections in an appendix to the filing. Texas Eastern requests this abandonment authorization to clarify the regulatory status of these facilities and to ensure that Texas Eastern’s

records include documentation supporting their abandonment. Texas Eastern states that the proposed abandonment will not adversely impact existing Texas Eastern service provided and will not affect existing rates or tariff provisions.

Questions regarding this application may be directed to Lisa A. Connolly, General Manager, Rates & Certificates, Texas Eastern Transmission, LP, P.O. Box 1642, Houston, Texas, 77251–1642, or by calling (713) 627–4102; by fax 713–627–5947 or by email to laconnolly@spectraenergy.com.

Pursuant to section 157.9 of the Commission’s rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: complete its environmental assessment (EA) and place it into the Commission’s public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff’s issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission’s public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff’s FEIS or EA.

There are two ways to become involved in the Commission’s review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission’s Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit seven copies of filings made in the proceeding with the Commission and must mail a copy to the applicant and to every other party. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to

participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such motions or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant, on or before the comment date. It is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission strongly encourages electronic submission of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and seven copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov> using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC.

There is an "eSubscription" link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s).
