DELETIONS:

B0502-03, Master Billet/Access Records (March 19, 2002, 67 FR 12532).

REASON:

This system was originally established to identify and verify personnel authorized access to SCI in order to control access to secure areas for use of classified information, for periodic re-indoctrination (re-briefing) of employees for SCI access, for periodic security education and training, and for control and reissue of identification badges. Because the stand-alone system no longer exists, records in that system are now covered under NGA-003, National Geospatial-Intelligence Agency Enterprise Workforce System (May 24, 2013, 78 FR 31526); therefore, B0502-03, Master Billet/Access Records can be deleted.

B1211-03, Passport and Visa Files (January 18, 2002, 67 FR 2639).

REASON:

This system was originally established to issue passports and visas to agency personnel and their dependents for official government travel and to obtain necessary visas from appropriate embassies. Because the stand-alone system no longer exists, records in that system are now covered under NGA-003, National Geospatial-Intelligence Agency Enterprise Workforce System (May 24, 2013, 78 FR 31526); therefore, B1211-03, Passport and Visa Files can be deleted.

B0502-15, Security Compromise Case Files (March 19, 2002, 67 FR 12532).

REASON:

This system was originally established to protect records relating to investigations conducted into alleged and/or actual security violations by Security Office personnel and appointed investigating officials. Because the stand-alone system no longer exists, records in that system are now covered under NGA-003, National Geospatial-Intelligence Agency Enterprise Workforce System (May 24, 2013, 78 FR 31526); therefore, B0502-15, Security Compromise Case Files can be deleted.

B0303-5, Leave Record Files (February 22, 1993, 58 FR 10189).

REASON:

This system was originally established to record official annual accumulation and use of employees' leave. Because the stand-alone system no longer exists, the records are now covered under NGA-003, National Geospatial-Intelligence Agency Enterprise Workforce System (May 24, 2013, 78 FR 31526); therefore, B0303-5, Leave Record Files can be deleted.

B0614-01, Military Personnel Information Files (March 19, 2002, 67 FR 12532).

REASON:

This system was originally established to determine the acceptability of an individual nominated by the parent service for an agency position, to be used in the preparation of efficiency/fitness/effectiveness reports, award recommendations, and other personnel actions. Because the stand-alone system no longer exists, records in that system are now covered under NGA-003, National Geospatial-Intelligence Agency Enterprise Workforce System (May 24, 2013, 78 FR 31526); therefore, B0614-01, Military Personnel Information Files can be deleted.

B0504-01-2, Personnel Security and Suitability Files (December 2, 1994, 59 FR 61885).

REASON:

This system was originally established to maintain up-to-date personnel security and suitability information for civilians, military and applicant personnel who require access to classified information, to determine and ensure continued eligibility for access to classified information. Because the overall purpose of the system has changed, records in that system are now covered under NGA-003, National Geospatial-Intelligence Agency Enterprise Workforce System (May 24, 2013, 78 FR 31526); therefore, B0504-01-2, Personnel Security and Suitability Files can be deleted.

B0503-02, Security Identification Accountability Files (March 19, 2002, 67 FR 12532).

REASON:

This system was originally established to maintain accountability for various identification cards/badges issues and identify to whom issued. Because the stand-alone system no longer exists, records in that system are now covered under NGA-003, National Geospatial-Intelligence Agency

Enterprise Workforce System (May 24, 2013, 78 FR 31526); therefore, B0503-02, Security Identification Accountability Files can be deleted.

Notice of Intent To Prepare a Draft Environmental Impact Statement for the Whittier Narrows Dam Safety Modification Study Report

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA), the U.S. Army Corps of Engineers, Los Angeles District (Corps) intends to prepare an Environmental Impact Statement (EIS) for the Whittier Narrows Dam Safety Modification Study (DSMS).

Whittier Narrows Dam is located approximately 12 miles east of downtown Los Angeles, Los Angeles County, CA. The DSMS will evaluate alternatives to remediate safety concerns such as dam settling, seismic damages, and seepage. The DSMS will identify risk reduction measures that would be implemented to reduce life loss and property damage downstream in the event of a dam failure.

SUPPLEMENTARY INFORMATION:

1. Background Information.

Construction of Whittier Narrows Dam was completed in 1957 as an integral component of the Los Angeles County Drainage Area system of dams and channelized rivers authorized by Congress in the Flood Control Act of 1936. After almost 60 years of settlement and damage from seismic events, the Corps has determined that the Whittier Narrows Dam has a high risk of failure due to significant seismic, seepage, and hydrologic issues. The DSMS and EIS would identify and evaluate alternatives to remedy these deficiencies. In the interim, the Corps has implemented several measures including: emergency management preparedness, remote monitoring, increased inspections, pre-positioning of materials for flood fighting, and updated flood mapping.

2. *Preliminary Alternatives.* The DSMS and EIS will identify and evaluate an array of remediation alternatives including: (1) Raising the crest elevation of the dam by 5 feet with a 5 foot high parapet wall on top of the crest; (2) constructing a weir in the embankment to allow smaller flood events to flow over the weir; (3) placing a fuseplug by taking out a section of the embankment and filling it with a concrete wall that would break at a lower elevation of water; and (4) removing sediment and deepening Santa Fe Dam Basin which is located upstream of the Whittier Narrows Dam to increase upstream holding capacity.

3. *Preliminary NEPA Scope of Analysis.* The EIS will also evaluate the impacts of alternatives on environmental resources. Resources initially identified in the NEPA scope of analysis as potentially significant without implementation of mitigation measures include, but are not limited to: water quality, noise and vibration, air quality, socioeconomic and environmental justice, land use, recreation, visual and aesthetic resources, traffic and transportation, historical and cultural resources, vegetation and wildlife, and special status species.

4. *NEPA Scoping Meeting:* A public scoping meeting is preliminarily
