

Act (“Illinois Act”), 415 ILCS 5/1 *et seq.* (2010), and seeks injunctive relief and civil penalties against the Gateway Defendants for violations of the Illinois Act. The State of Ohio asserts claims in this action relating to the Haverhill Facility under Chapter 3745 of the Ohio Revised Code (“ORC”), and the rules adopted thereunder, and seeks injunctive relief and civil penalties against the Haverhill Defendants for violations of ORC Chapter 3704. The Complaint alleges that the Gateway Defendants operated the Gateway Facility and the Haverhill Defendants operated the Haverhill Facility in excess of bypass venting limits specified in their Prevention of Significant Deterioration permits, and that the Haverhill Defendants failed to comply with emissions monitoring and reporting requirements.

The Consent Decree would require (1) installation of process equipment to provide redundancy that will allow hot coking gases to be routed to a pollution control device instead of vented directly to the atmosphere in the event of equipment downtime; (2) installation of continuous emissions monitoring systems for sulfur dioxide, at one bypass vent per process unit (two at the Haverhill Facility and one at the Gateway Facility); (3) payment of a civil penalty of \$1.995 million, of which \$1.27 million will go to the United States, \$575,000 to the State of Illinois, and \$150,000 to the State of Ohio; and (4) performance of a lead hazard abatement supplemental environmental project at a cost of \$255,000 at the Gateway Facility.

In a **Federal Register** Notice published on July 2, 2013, the Department of Justice announced its intention to receive comments relating to the Consent Decree for a period of thirty (30) days from the date of that publication. 78 FR 39770 (July 2, 2013). In this action the United States, on behalf of the Environmental Protection Agency (“EPA”), filed a complaint against Defendant seeking permanent injunctive relief and civil penalties under the Clean Water Act (“CWA”), 33 U.S.C. 1251–1387, resulting from unauthorized discharges of flowback fluid and produced fluid into waters of the United States from tanks and valves associated with Defendant’s hydraulic fracturing operations at Defendant’s well pad and storage facility located at 301 Marquardt Road, in Penn Township, Lycoming County, Pennsylvania. Produced fluid and flowback fluid contain contaminants such as barium, calcium, iron, magnesium, manganese, potassium, sodium, strontium, bromide, chloride,

and total dissolved solids. The Decree requires Defendant to undertake compliance measures to prevent and contain future releases. These measures include installation of secondary containment, high level shut-down devices, and caps, flanges and plugs at Defendant's existing and new natural gas wells within EPA Region 3; implementation of standard operating procedures for tank loading and unloading; and an obligation to increase recycling of produced fluid and flowback fluid. In addition, the Decree requires the Defendant to pay within thirty (30) days the sum of \$100,000 as a civil penalty, together with interest accruing from the date on which the Decree is lodged with the court.
