SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Title: EPA's Design for the Environment (DfE) Logo Redesign Consultations.

ICR number: EPA ICR No. 2487.01.

OMB control number: OMB Control No. 2070-new.

ICR status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond

to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This information collection supports the consultation process by which the U.S. Environmental Protection Agency (EPA) will select a revised logo and messaging for its Design for the Environment (DfE) program. A key goal of the Agency's DfE program is to work with businesses to voluntarily incorporate safer chemicals and other health and environmental considerations into the design of their products and processes. To achieve this goal, DfE relies on outreach activities and information dissemination to industry participants and the public, as well as non-governmental organizations, EPA Regions, federal government laboratories, and state and local governments. Effective outreach and communications are vital to program success. The DfE program must ensure that its logo communicates clearly its safer chemistry and pollution prevention goals.

DfE's current logo has remained unchanged since the program began in 1992. The current DfE logo is dated and does not adequately convey and enable DfE's objective: To advance chemical-based products that are safer for people and the environment. A redesigned logo and messaging are needed to enhance communications and for the program to reach its potential. It is important for the redesign effort to be informed by consumers, manufacturing partners, retailers, and other key audiences.

To help ensure broad public participation in the redesign process and that EPA receives input from a diverse demographic, the Agency will conduct a number of focus group sessions to obtain feedback on several logo design concepts and associated wording. DfE will also sponsor two surveys, as discussed in Part B of the Supporting Statement, to gauge public awareness and understanding of the logo and its meaning before and after the redesign.

Responses to the collection of information are voluntary. Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim

of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to range between 0.17 and 2 hours per response depending upon the type of respondent. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR are individual adult consumers who are members of the general population.

Estimated total number of potential respondents: 198.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 66 hours.

Estimated total annual costs: \$ 2,035. This includes an estimated burden cost of \$0 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

Because this is a new ICR, change in burden is not applicable.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
