Small Business Size Standards; Support Activities for Mining; Correction
AGENCY: U.S. Small Business Administration.
ACTION: Final rule; correction.
SUMMARY: The U.S. Small Business Administration (SBA) is correcting a final rule that appeared in the Federal Register on June 20, 2013 (78 FR 37404). The document amended SBA’s Small Business Size Regulations by increasing small business size standards for three of the four industries in North American Industry Classification System (NAICS) Subsector 213, Support Activities for Mining, that are based on average annual receipts. This correction does not affect the revised size standards themselves or the Code of Federal Regulations.
FOR FURTHER INFORMATION CONTACT: Khem Sharma, Chief, Office of Size Standards, U.S. Small Business Administration, 409 Third Street SW., Washington, DC 20416.
SUPPLEMENTARY INFORMATION: In FR Doc. 2013–14712 appearing on page 37404 in the June 20, 2013 Federal Register issue, the following correction is made:

1. On page 37406, in the heading for column 4 of Table 1, Summary of Revised Size Standards in NAICS Subsector 213, the word “Proposed” is corrected to read “Revised.” The corrected heading for Table 1 reads as follows:

<table>
<thead>
<tr>
<th>NAICS code</th>
<th>NAICS industry title</th>
<th>Current size standard ($ million)</th>
<th>Revised size standard ($ million)</th>
</tr>
</thead>
</table>

The Correcting Amendment

In consideration of the foregoing, the Federal Aviation Administration amends chapter I of title 14, Code of Federal Regulations as follows:

PART 35—AIRWORTHINESS STANDARDS: PROPELLERS

1. The authority citation for part 35 continues to read as follows:
Authority: 49 U.S.C. 106(g), 40113, 44701–44702, 44704.

2. Amend §35.15 by revising paragraphs (c) and (d) to read as follows:
§35.15 Safety analysis.  
* * * * *
(c) The primary failures of certain single propeller elements (for example, blades) cannot be sensibly estimated in numerical terms. If the failure of such elements is likely to result in hazardous propeller effects, those elements must be identified as propeller critical parts. For propeller critical parts, applicants must meet the prescribed integrity specifications of §35.16. These instances must be stated in the safety analysis.

(d) If reliance is placed on a safety system to prevent a failure progressing to hazardous propeller effects, the possibility of a safety system failure in combination with a basic propeller failure must be included in the analysis. Such a safety system may include safety devices, instrumentation, early warning devices, maintenance checks, and other similar equipment or procedures. If items of the safety system are outside the control of the propeller manufacturer, the assumptions of the safety analysis with respect to the reliability of these parts must be clearly stated in the analysis and identified in the propeller installation and operation instructions required under §35.3.

Issued under authority provided by 49 U.S.C. 106(f), 44701(a), and 44703 in Washington, DC, on July 19, 2013.
