Proposal to approve under OMB delegated authority the extension for three years, with revision, of the following report:

Report title: Intermittent Survey of Business.

Agency form number: FR 1374.

OMB control number: 7100–0302.

Frequency: On Occasion.

Reporters: Businesses and state and local governments.

Estimated annual reporting hours: 1,825 hours.

Estimated average hours per response: 15 minutes.

Number of respondents: 2410.

General description of report: This information collection is voluntary (12 U.S.C. 225a and 263) and may be given confidential treatment (5 U.S.C. 552(b)(4)).

Abstract: The survey data are used by the Federal Reserve to gather information specifically tailored to the Federal Reserve's policy and operational responsibilities. There are two parts to this event-generated survey. First, under the guidance of Board economists, the Federal Reserve Banks survey business contacts as economic developments warrant. Currently, there are approximately 240 business

respondents for each survey (about 20 per Reserve Bank); occasionally state and local government officials are called, in which case there are far fewer respondents. It is necessary to conduct these surveys to provide timely information to the members of the Board and to the presidents of the Reserve Banks. Usually, these surveys are conducted by Reserve Bank staff economists telephoning or emailing purchasing managers, economists, or other knowledgeable individuals at selected, relevant businesses. Reserve Bank staff may also use online survey tools to collect responses to the survey. The frequency and content of the questions, as well as the entities contacted, vary depending on developments in the economy. Second, economists at the Board survey business contacts by telephone, inquiring about current business conditions. Board economists conduct these surveys as economic conditions require, with approximately ten respondents for each survey.

Current actions: The Federal Reserve proposes to increase the permitted number of respondents from 240 to 2,400, for the Reserve Bank surveys. This increase would allow (but not require) Reserve Banks to survey an average of 200 respondents per District instead of 20, providing better representation and more complete coverage of the developments within each District. The Reserve Banks have recently increased the number of businesses surveyed to better assess local markets (especially with respect to issues of broad applicability). The Board part of the survey would remain unchanged.

Board of Governors of the Federal Reserve System, July 23, 2013.

Robert de V. Frierson,
Secretary of the Board.
