Total Annual Burden: 5,360 hours.

Total Annual Cost: None.

Privacy Impact Assessment: N.A.

Nature and Extent of Confidentiality:

There is a minimal exemption from the Freedom of Information Act (FOIA), 5 U.S.C. 552(b)(4) and 47 CFR 0.459(d) of the Commission's rules that is granted for trade secrets, which may be submitted to the Commission as part of the documentation of the test results. No other assurances of confidentiality are provided to respondents.

Needs and Uses: The Commission will submit this information collection after this 60 day comment period to obtain the full three year clearance from the Office of Management and Budget (OMB).

Description of Measurement Facilities

The Commission established uniform technical standards for various non-licensed equipment operating under the guidelines established in 47 CFR parts 2, 15 and 18 of the FCC rules, which include personal computers, garage door openers, baby monitors, etc. In order to ensure that technical standards are applied uniformly to non-licensed equipment, the Commission requires manufacturers to follow the standardized measurement procedures and practices:

(a) 47 CFR part 2 of the Commission's rules requires each Electro-Magnetic Compatibility (EMC) testing facility that performs equipment testing in support of any request for equipment authorization to file a test site description with the Commission. The Commission also permits a testing facility to be accredited by Commission-approved accrediting bodies. A testing laboratory that is accredited by a Commission-approved accrediting body is not required to file a test site description with the Commission since the accreditation body will review this information as part of the accreditation assessment.

(b) The test site description and the supporting information documents that the EMC testing facility complies with the testing standards used to make the measurements that support any request for equipment authorization.

The Commission or a Telecommunications certification body uses the information from these test sites and the supporting documentation, which accompany all requests for equipment authorization:

(a) To ensure that the data are valid and that proper testing procedures are used;

(b) To ensure that potential interference to radio communications is controlled; and

(c) To investigate complaints of harmful interference or to verify the manufacturer's compliance with Section 47 CFR 2.948 of the Commission's rules.

Accreditation Bodies

On September 14, 2009, the Office of Engineering and Technology (OET) identified and requested comment on certain types of information that an applicant should provide to be considered as an accreditation body of test laboratories under the Commission's rules, *see* DA 09–2049. 47 CFR 2.948(d) of the Commission's rules sets forth the requirements for accreditation bodies seeking recognition from the FCC as a laboratory accreditation body. Accreditation bodies seeking such recognition from the Commission must file a report of their qualifications with the Office of Engineering and Technology (OET). They are only required to file this information once. The Commission currently has three recognized accreditations bodies.

Other Information

In addition, the referenced 47 CFR part 15 rules (47 CFR 15.117(g)(2)) require that certain equipment manufacturers file information concerning the testing of TV receivers, which tune to UHF channels, to show that the UHF channels provide approximately the same degree of tuning accuracy with approximately the same expenditure of time and effort.

SUPPLEMENTARY INFORMATION:

A. Purpose

To enable contracting officers to verify that pass-through charges are not excessive, the clause at FAR 52.215-22, Limitations on Pass-Through Charges—Identification of Subcontract Effort, requires offerors submitting a proposal for a contract, task order, or delivery

order to provide the following information with its proposal:

(1) The percent of effort the offeror intends to perform and the percent expected to be performed by each subcontractor.

(2) If the offeror intends to subcontract more than 70 percent of the total cost of work to be performed—

(i) The amount of the offeror's indirect costs and profit/fee applicable to the work to be performed by the subcontractor(s); and,

(ii) A description of the value added by the offeror as related to the work to be performed by the subcontractor(s).

(3) If any subcontractor intends to subcontract to a lower-tier subcontractor more than 70 percent of the total cost of work to be performed under its subcontract—

(i) The amount of the subcontractor's indirect costs and profit/fee applicable to the work to be performed by the lower-tier subcontractor(s); and,

(ii) A description of the value added by the subcontractor as related to the work to be performed by the lower-tier subcontractor(s).

In addition, if the amount of the effort to be subcontracted by the contractor or a subcontractor changes from the amount identified in the proposal such that it exceeds 70 percent of the total cost of work to be performed, the clause at FAR 52.215-23, Limitations on Pass-Through Charges, requires contractors to provide a description of the value added by the contractor or subcontractor, as applicable, as related to the subcontract effort.

B. Discussion and Analysis

One respondent submitted public comments on the extension of the previously approved information collection. The analysis of their public comments is summarized as follows:

Comment: The respondent commented that the extension of the information collection would violate the fundamental purposes of the Paperwork Reduction Act because of the burden it puts on the entity submitting the information and the agency collecting the information.

Response: In accordance with the Paperwork Reduction Act (PRA), agencies can request OMB approval of an existing information collection. The PRA requires that agencies use the **Federal Register** notice and comment process, to extend OMB's approval, at least every three years. This extension, to a previously approved information collection, pertains to FAR clause 52.215-22. This clause requires offerors submitting a proposal for a contract, task order, or delivery order to provide
