

Technical Proposal. If an applicant fails to provide a redacted version of the Technical Proposal by October 21, 2013, DOL will publish the original Technical Proposal in full, after redacting only personally identifiable information. (Note that the original, unredacted version of the Technical Proposal will remain part of the complete application package, including an applicant's proprietary and confidential business information and any personally identifiable information.)

Applicants are encouraged to disclose as much of the grant application information as possible, and to redact only information that clearly is proprietary, confidential commercial/business information, or capable of identifying a person. The redaction of entire pages or sections of the Technical Proposal is not appropriate, and will not be allowed, unless the entire portion merits such protection. Should a dispute arise about whether redactions are appropriate, DOL will follow the procedures outlined in the Department's Freedom of Information Act (FOIA) regulations (29 CFR Part 70).

Redacted information in grant applications will be protected by DOL from public disclosure in accordance with federal law, including the Trade Secrets Act (18 U.S.C. 1905), FOIA, and the Privacy Act (5 U.S.C. 552a). If DOL receives a FOIA request for your application, the procedures in DOL's FOIA regulations for responding to requests for commercial/business information submitted to the government will be followed, as well as all FOIA exemptions and procedures. 29 CFR 70.26. Consequently, it is possible that application of FOIA rules may result in release of information in response to a FOIA request that an applicant redacted in its "redacted copy."

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The information collection requirements specified in the Noise Standard protect workers from suffering material hearing impairment. The Standard requires employers to: Monitor worker exposure to noise when it is likely that such exposures may equal or

exceed 85 decibels measured on the A scale (dBA) for an 8-hour time-weighted average (TWA) (action level); take action to reduce noise exposures to the 90 dBA permissible exposure limit (PEL); and provide an effective hearing conservation program (HCP) for all workers exposed to noise at a level greater than, or equal to, a TWA of 85 dBA.

The HCP contains information on: Conducting noise monitoring; notifying workers when they are exposed at or above an 8-hour time-weighted average of 85 decibels; providing workers with initial and annual audiograms; notifying workers of a loss in hearing based on comparing audiograms; training workers on the effects of noise, hearing protectors, and audiometric examinations; maintaining records of workplace noise exposure and workers' audiograms; and allowing OSHA, workers, and their designated representatives access to materials and records required by the Standard.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting an adjustment decrease of burden hours associated with the paperwork requirements in the Standard from 2,604,597 hours to 2,068,736 hours (a total decrease of 535,861 hours). The Agency is also requesting an adjustment decrease in the cost under Item 13 from \$82,190,075 to \$26,296,876; a total decrease of \$55,893,199. The Agency determined that it had counted the cost of worker travel and the cost of worker time under Item 12 in previous ICRs. Thus, it found that it had been double counting hours under certain instances.

OSHA has reduced the number of establishments and workers by 19.6%. The 19.6% reduction reflects that virtually all sectors affected by the Noise Standard are in manufacturing;

and, that the number of workers in manufacturing has decreased from 13.3 million in 2009 to 10.7 million today.

Additionally, the Agency has determined that training is not subject to PRA-95 and has removed the burden hours and cost associated with it.

The Agency is requesting a decrease in the burden hours from 2,604,597 to 2,068,736 hours for a total decrease of 535,861 hours. The reduction is a result of a 19.6% reduction in the number of workers and manufacturing establishments. Also, the Agency now assumes that 50% of small establishment workers will receive audiometric exams via mobile testing vans. The previous ICR assumed that all small establishment workers would go off-site to receive their audiometric examination.

OSHA will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to extend the approval of the information collection requirements contained in the Occupational Exposure to Noise Standard (29 CFR 1910.95).

Type of Review: Extension of a currently approved collection.

Title: Occupational Exposure to Noise (29 CFR 1910.95).

OMB Control Number: 1218-0048.

Affected Public: Business or other for-profits.

Number of Respondents: 209,851.

Total Responses: 16,458,932.

Frequency of Responses: On occasion.

Average Time per Response: Varies from 1 minute (.02 hour) for a manager to provide a worker with a copy of a referral or notification of the need for an ontological examination to 1 hour for a worker to travel to a testing site, take the audiometric exam and return to work.

Estimated Total Burden Hours: 2,068,736.

Estimated Cost (Operation and Maintenance): \$26,296,876.
