

catch subject to the crab cost recovery fee liability for the current year. Fee collections for any given year may be less than, or greater than, the actual costs and fishery value for that year, because, by regulation, the fee percentage is established in the first quarter of a crab fishery year based on the fishery value and the costs of the prior year.

Using this fee percentage formula, the estimated percentage of costs to value for the 2012/2013 fishery was 0.69 percent. Therefore, the fee percentage will be 0.69 percent for the 2013/2014 crab fishing year.

SUPPLEMENTARY INFORMATION:

Title of Collection: Evaluations of Financial Capability Programs for Economically-Vulnerable Consumers: Two Randomized Evaluations.

OMB Control Number: 3170–XXXX.

Type of Review: Regular.

Affected Public: Individuals.

Estimated Number of Respondents: 2,700.

Estimated Total Annual Burden Hours: 1,350.

Abstract: The aim of this data collection effort is to understand the impact of bundled products and services on the financial decision-making of economically-vulnerable consumers in the United States. The information will be collected from economically-vulnerable consumers who consent to participate in these research studies. The target population for this survey collection is low-income, underserved consumers who are considered unbanked, underbanked, or have thin or no credit files and therefore have financial services needs that are not being met. We will collect information about the financial health of these consumers, such as the amount of money they hold in savings, their credit score, and the size of their debt to income ratio. We will also collect information about their financial capability. The purpose of this data collection effort is to understand whether bundled products and services that are designed to build savings and credit for economically-vulnerable consumers have an impact on assets building and financial capability.

Request for Comments: Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Bureau, including whether the information will have practical utility; (b) The accuracy of the Bureau’s estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and
