minimize the risk of loss to the National Credit Union Share Insurance Fund (NCUSIF).

The NCUA requests that you send your comments on this collection to the location listed in the addresses section. Your comments should address: (a) The necessity of the information collection for the proper performance of NCUA, including whether the information will have practical utility; (b) the accuracy of our estimate of the burden (hours and cost) of the collection of information, including the validity of the methodology and assumptions used; (c) ways we could enhance the quality, utility, and clarity of the information to be collected; and (d) ways we could minimize the burden of the collection of the information on the respondents such as through the use of automated collection techniques or other forms of information technology. It is NCUA’s policy to make all comments available to the public for review.

II. Data

Title: 12 CFR Part 712, Credit Union Service Organizations (CUSOs).

OMB Number: 3133–0149.

Form Number: None.

Type of Review: Reinstatement, with change, of a previously approved collection.

Description: This rule helps ensure that relationships that credit unions have with credit union service organizations are adequately and properly documented.

Respondents: Federal credit unions.

Estimated No. of Respondents/Recordkeepers: 148 (133 written agreements plus 15 waivers).

Estimated Burden Hours per Response: 2 hours total.

Frequency of Response: On occasion.

Estimated Total Annual Burden Hours: 562 hours.

Estimated Total Annual Cost: $31.56/hr, or $17,737.

By the National Credit Union Administration Board on July 30, 2013.

Gerard Poliquin,
Secretary of the Board.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–027 and 52–028; NRC–2008–0441]

Virgil C. Summer Nuclear Station, Units 2 and 3; South Carolina Electric and Gas; Change to the Containment Structure for Additional Electrical Penetration Assemblies

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting both an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and License Amendment No. 6 to Combined Licenses (COL), NPF–93 and NPF–94. The COLs were issued to South Carolina Electric and Gas (SCE&G) and South Carolina Public Service Authority (Santee Cooper) (the licensee), for construction and operation of the Virgil C. Summer Nuclear Station (VCSNS), Units 2 and 3 located in Fairfield County, South Carolina. The amendment changes requested adding four electrical penetration assemblies to the containment vessel and shield building in order to support the current electrical loads required within containment. This request includes changes to Tier 1 information located in Tables 2.2.1–1 and 2.2.3–6 as well as Figure 2.2.1–1 of the Updated Final Safety Analysis Report (UFSA). The granting of the exemption allows the Tier 1 changes asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

ADDRESSES: Please refer to Docket ID NRC–2008–0441 when contacting the NRC about the availability of information regarding this document. You may access or search information in this docket on the internet at http://www.regulations.gov. You may examine and purchase copies of public documents at the NRC’s PDR: NRC’s PDR: 11555 Rockville Pike, Rockville, Maryland 20852.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, “Scope and Contents,” of Appendix D, “Design Certification Rule for the AP1000,” to Part 52 of Title 10 of the Code of Federal Regulations (10 CFR) and issuing License Amendment No. 6 to COLs, NPF–93 and NPF–94, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, “Processes for Changes and Departures,” Appendix D to 10 CFR Part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought to add additional electrical penetration assemblies to containment and the shield building. As part of this request, the licensee needed to change Tier 1 information located in Tables 2.2.1–1 and 2.2.3–6 as well as Figure 2.2.1–1 of the UFSA. These changes were necessary in order to support the electrical loads within containment. No additional loads or modifications to existing loads are required as part of this request.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the
exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff’s review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4 of Appendix D to 10 CFR Part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML13135A594.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VCSNS Units 2 and 3 (COLs NPF–93 and NPF–94). These documents can be found in ADAMS under Accession Nos. ML13135A579 and ML13135A586. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF–93 and NPF–94 are available in ADAMS under Accession Nos. ML13135A574 and ML13135A577. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to VCSNS Units 2 and 3. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

For the reasons set forth in Section 3.1, “Evaluation of Exemption,” of the NRC staff’s Safety Evaluation, which can be found in ADAMS under Accession No. ML13135A316, the Commission finds that:

A. The exemption is authorized by law;
B. The exemption presents no undue risk to public health and safety;
C. The exemption is consistent with the common defense and security;
D. Special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;
E. The special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and
F. The exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption to the provisions of 10 CFR Part 52, Appendix D, Section III.B, to allow deviations from the certified Design Control Document (DCD) Tier 1 Table 2.2.1–1, Figure 2.2.1–1, and Table 2.2.3–6 as described in the licensee’s request dated August 29, 2012 and supplemented on February 11, 2013. This exemption is related to, and necessary for the granting of License Amendment No. 6, which is being issued concurrently with this exemption.

3. As explained in Section 5.0, “Environmental Consideration,” of the NRC staff Safety Evaluation (ADAMS Accession No. ML13135A594), this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of July 1, 2013.

III. License Amendment Request

By letter dated August 29, 2012, the licensee requested that the NRC amend the COLs for VCSNS Units 2 and 3, COLs NPF–93 and NPF–94. The licensee supplemented this application on February 11, 2013. The proposed amendment would depart from Tier 2 Material previously incorporated into the UFSAR. Additionally, these Tier 2 changes involve changes to Tier 1 Information in the UFSAR, and the proposed amendment would also revise the associated material that has been included in Appendix C of each of the VEGP, Units 3 and 4 COLs. The requested amendment will revise the Tier 2 information pertaining to the affected structures and tables related to electrical penetration assemblies. These changes require modifications to particular Tier 1 information located in Tables 2.2.1–1 and 2.2.3–6, and Figure 2.2.1–1 of the UFSAR, as well as the corresponding information in Appendix C. The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission’s rules and regulations.

The Commission has made appropriate findings as required by the Act and the Commission’s rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. These changes were necessary in order to support the electrical loads within containment. No additional loads or modifications to existing loads are required as part of this request.

A. A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and no comments were received during the 60-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on August 29, 2012, and supplemented by letter dated February 11, 2013. The exemption and amendment were issued on July 1, 2013 as part of a combined package to the licensee. (ADAMS Accession No. ML13135A322).

Dated at Rockville, Maryland, this 26th day of July 2013.

For the Nuclear Regulatory Commission.

Lawrence Burkhart,
Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.
