Iraq—M1135 Stryker Nuclear, Biological, and Chemical Reconnaissance Vehicles

The Government of Iraq has requested a possible sale of 50 M1135 Stryker Nuclear, Biological, and Chemical Reconnaissance Vehicles, DECON 3000 Decontamination Systems, M26 Commercial Joint Service Transportable Decontamination Systems (JSTDS), AN/VRC-89 Single Channel Ground and Airborne Radio Systems (SINCGARS) with Global Positioning System (GPS), AN/VRC-90 SINCGARS with GPS, M40A1 Protective Masks, Lightweight Personal Chemical Detectors LCD-3, Portable Chemical Warfare Agent Detectors GID-3, MultiRAE PLUS Gas Detectors, AN/VDR-2 Radiac Sets, M256 Chemical Agent Detector Kits, Decontamination Kits, Chemical Biological Mask Canisters, M8 Chemical Paper Agent Detector Kits, water canteens, individual clothing and equipment, spare and repair parts, support equipment, communication equipment, publications and technical data, personnel training and training equipment, site surveys, a Quality Assurance Team, U.S. Government and contractor technical assistance, and other related elements of program and logistics support. The estimated cost is \$900 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a strategic partner. This proposed sale will contribute to Iraq's stability and sovereignty by increasing its situational awareness and ability to identify potential Chemical, Biological, Radiological and Nuclear (CBRN) agents. This proposed sale directly supports the Iraqi government and serves the interests of the Iraqi people and the United States.

This equipment provides the Iraqi Army CBRN reconnaissance units with reliable capabilities for early warning of contamination by radiological, biological, and chemical material. Overall, these systems meet the requirements of providing the Iraqi Army with the ability to conduct CBRN

reconnaissance techniques of search, survey, surveillance, and sampling to reduce the effects of exposure to these hazardous agents.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors involved in this program are General Dynamics Land System of Sterling Heights, Michigan; Karcher Futuretech of Schwaileim, Germany; DRS Technologies of Florence, Kentucky; Smiths Detection of Danbury, Connecticut; and Federal Resources of Stevensville, Maryland. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require approximately 35 U.S. Government or contractor representatives to travel to Iraq for a period of up to 2 years to provide management and training.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Title of Collection: Integrated Postsecondary Education Data System (IPEDS) 2013-2016.

OMB Control Number: 1850-0582.

Type of Review: Revision of an existing collection of information.

Respondents/Affected Public: State, Local, or Tribal Governments.

Total Estimated Number of Annual Responses: 71,867.

Total Estimated Number of Annual Burden Hours: 929,530.

Abstract: The Integrated Postsecondary Education Data System (IPEDS) is a web-based data collection system designed to collect basic data from all postsecondary institutions in the United States and the other jurisdictions. IPEDS enables NCES to report on key dimensions of postsecondary education such as enrollments, degrees and other awards earned, tuition and fees, average net price, student financial aid, graduation

rates, revenues and expenditures, faculty salaries, and staff employed. The IPEDS web-based data collection system was implemented in 2000–01, and it collects basic data from approximately 7,500 postsecondary institutions in the United States and the other jurisdictions that are eligible to participate in Title IV Federal financial aid programs. All Title IV institutions are required to respond to IPEDS (Section 490 of the Higher Education Amendments of 1992 (Pub. L. 102–325)). IPEDS allows other (non-title IV) institutions to participate on a voluntary basis. About 200 elect to respond. IPEDS data are available to the public through the College Navigator and IPEDS Data Center Web sites. The National Center for Education Statistics (NCES) seeks authorization to continue its IPEDS data collection. Current authorization expires 6/30/2014 (OMB No. 1850–0582). We are requesting a new clearance for the 2014–15 and 2015–16 data collections now in order to provide institutions advanced notice of changes to the current data collection. Because the already approved 2013–14 IPEDS data collection has not yet taken place, we are carrying over the documentation and estimated burden associated with the 2013–14 data collection.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management.
