Abstract: Under the Dodd-Frank Wall Street Reform and Consumer Protection Act, Public Law 111-203, the Bureau's Office of Financial Education is responsible for developing and implementing a strategy to improve the financial literacy of consumers that includes measurable goals and initiatives, in consultation with the Financial Literacy and Education Commission, consistent with the National Strategy for Financial Literacy. In addition, the Office of Financial Protection for Older Americans within the Bureau is charged with conducting research to identify methods and strategies to educate and counsel seniors, and developing goals for programs that provide seniors with financial literacy and counseling.

The CFPB intends to collect quantitative data through surveys with working-age (age 18-61) and older American (age 62 and older) consumers in order to develop and refine survey instruments that will enable the CFPB to reliably and accurately measure adult consumers' financial well-being. The primary anticipated data collection strategy is through Internet-based surveys. The core objective of the data collection is to iteratively test, refine, and produce valid and reliable measures of consumer financial well-being that will create a strong, standardized basis for setting measurable goals, and evaluating financial education strategies and programs.
