DATES: Submit comments on or before September 9, 2013.

SUPPLEMENTARY INFORMATION: Employee Retirement Income Security Act of 1974 (ERISA) section 105(a) requires an ERISA-covered individual account plan administrator to furnish periodic benefit statements to participants and beneficiaries. This new ICR seeks OMB approval to conduct a survey and an experiment on participants in an existing household American Life Panel (ALP) via the Internet and to conduct four focus groups of non-panel members. The survey and focus groups would explore whether information contained in sample benefit statements can be presented in a way that improves recipients' understanding of the statements and helps them better plan for retirement. Specifically, the EBSA would collect data through four focus groups that will pretest the model benefits statements, each containing slightly different information, and a survey of 2,900 ALP respondents. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on January 22, 2013 (78 FR 4458).

This proposed information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB ICR Reference Number 201305-1210-006. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the

proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
