The NOS Lab (File No. 17557) has been issued a permit to receive, import, export, transfer, archive, and conduct analyses on an unlimited number of marine mammal and endangered species parts. Species include all cetaceans, pinnipeds (except for walrus), sea turtles (in the water), smalltooth (*Pristis pectinata*) and largetooth (*P. perotteti*) sawfish, shortnose (*Acipenser brevirostrum*), green (*A. medirostris*), Atlantic (*A. oxyrinchus oxyrinchus*) and Gulf (*A. oxyrinchus desotoi*) sturgeon, black (*Haliotis cracherodii*) and white (*H. sorenseni*) abalone, chinook (*Oncorhynchus tshawytscha*), chum (*O. keta*), coho (*O. kisutch*) and sockeye (*O. nerka*) salmon, steelhead trout (*O. mykiss*), and totoaba (*Totoaba macdonaldi*). Samples would be archived at the NOS Lab and used to support law enforcement actions, research studies (primarily genetics), and outreach education. No live takes from the wild would be authorized. The permit is valid for five years from the date of issuance.

The NOAA Fisheries Northeast Region (File No. 17273) has been issued a permit to collect, receive and transport 100 dead shortnose and 100 dead Atlantic sturgeon, or parts thereof, annually. The applicant requests authorization for the receipt, importation, exportation, transfer, archive and analysis of Atlantic and shortnose sturgeon parts and carcasses. Sturgeon samples would be obtained from individuals authorized to collect them in the course of scientific research, salvage activities, or taken during other authorized activities. Sturgeon parts and samples would be used to support law enforcement actions, research studies (primarily genetics), and outreach education. The permit is valid for five years from the date of issuance.

Issuance of these permits, as required by the ESA, was based on a finding that such permits (1) were applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) are consistent with the purposes and
