**SUPPLEMENTARY INFORMATION:** On April 9, 2013, notice was published in the *Federal Register* (78 FR 21112) that a request for an amendment to Permit No. 14535–01 to conduct research on captive pinnipeds had been submitted by the above-named applicant. The requested permit amendment has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*); and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 14535–02 authorizes the addition of temporary threshold shift (TTS) studies to the currently approved research activities for captive pinnipeds held at Long Marine Laboratory in Santa Cruz, CA. This research may be conducted with up to two individuals from each of three species of ice seal: Spotted (*Phoca largha*), ringed (*Phoca hispida*), and bearded (*Erignathus barbatus*) seals trained for participation in ongoing behavioral hearing studies. This research will provide the first-ever

direct information about the noise levels that cause a temporary, recoverable reduction in hearing sensitivity following exposure events in ice seals. The research is accomplished using trained behaviors in which the animals voluntarily participate and can leave the testing area at any time.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activities proposed are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Dated: August 15, 2013.

Sea Life Park Hawaii proposes to continue to maintain and provide routine animal husbandry and veterinary care for one non-releasable adult Hawaiian monk seal and up to an additional three seals (four total, considering future non-releasable seals) at the monk seal exhibit at Sea Life Park Hawaii in Waimanalo, Hawaii. Sea Life Park would maintain in permanent captivity seals removed from the wild under separate permits for stranding response and enhancement, which are deemed non-releasable to the wild.

The animals will be made available for scientific studies by researchers whose research protocols are approved by the Sea Life Park Hawaii Curator and staff veterinarian and authorized under separate permits. A public conservation and education lecture will be conducted daily concerning the status of Hawaiian monk seals, and educational descriptive signs with current information are on display at the monk seal exhibit. The applicant requests a five-year permit.
