

environmental research and/or education purposes.

We will continue to provide for opportunistic wildlife observation and photography opportunities. We will develop additional public use facilities, such as trails, towers, boardwalks, and blinds, to increase opportunities for wildlife observation and photography. We will also develop environmental education and interpretation programs and materials (e.g., curriculum, teacher training) to be used both on and off the refuge.

Based on the availability of funding, we will add the following positions: Public use specialist, biologist, one full-time and one part-time biological technician, and maintenance worker.

This management action provides for the maintenance of all current equipment and facilities, including two boats and the office and residence buildings. It also provides for the development and maintenance of additional trails, towers, boardwalks, blinds, and the construction of a new headquarters/visitor contact station.

We will facilitate the formation of a friends group, increase cooperation with partners in habitat and wildlife management and public use, and establish formal agreements.

Contingent upon adding a public use specialist, we will develop and begin to implement a communication's plan.
