#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This collection of information supports both the White House initiative to create opportunities to advance science, technology, engineering, and mathematics (STEM) education, and the President's Council of Advisors on Science and Technology (PCAST) *Engage to Excel* goals to improve STEM education during the first two years of college. The Department of Commerce estimates that STEM occupations will grow 1.7 times faster than non-STEM occupations between 2008–2018. As demographics

in the U.S. continue to shift towards a more diverse populous, there is a need to attract underserved and underrepresented students to STEM degree fields. Traditionally, underrepresented groups in STEM include females, African-American, Hispanics, Native Americans, Pacific Islanders (natives of the Philippines, Guam, American Samoa, or Micronesia), and disabled students.

The NASA Glenn Research Center (GRC) Shadowing and Exploring Project is a career exploration initiative targeting students in the 14–20 age groups. It connects classroom training to tangible activities that enable practical application of STEM disciplines, and cultivates innovative thinking. The program is designed to increase awareness of STEM career paths and encourage both the pursuit and retention of STEM majors during the initial years of college. The program incorporates GRC scientists, engineers, technicians, and administrative professionals to serve as mentors to participating students. The NASA Glenn Research Center Shadowing and Exploring Project Participation are voluntary and registration is required to participate.
