II. Background

In November 1980, the Federal Emergency Management Agency (FEMA) issued FEMA–REP–10, Guide for the Evaluation of Alert and Notification Systems for Nuclear Power Plants (NPPs). Since that time, there have been changes to FEMA and Nuclear Regulatory Commission (NRC) regulations, guidance, policies and advances in technology. Many of the Alert and Notification Systems (ANS) from the 1980s are undergoing replacement and upgrade cycles.

The new guidance:

- Allows FEMA in its evaluations of alert and notification systems to take into account technology that was not available when FEMA REP–10 was first developed, such as smartphones and social media.

- Removes technical information from FEMA–REP–10.

- Introduces the Evaluation Report which replaces the previously used Design Report.

- Presents a new evaluation tenet: FEMA, the State, local entities and Tribes will work collaboratively to develop the Evaluation Report that addresses both technical aspects (previously covered in the Design Report) and planning aspects (ANS/Communication Plans) demonstrating the achievement of minimally acceptable design objectives.

- Refocuses REP–10 into an internal review guide for FEMA Evaluators aligning with other REP evaluation guides.

This proposed policy is to be a companion document to NUREG–0654/ FEMA–REP–1, Rev. 1 “Criteria for Preparation and Evaluation of Emergency Response Plans and Preparedness in Support of Nuclear Power Plants” and the FEMA Radiological Emergency Preparedness Program Manual. Both documents contribute to the achievement of reasonable assurance, which is a determination that State, local, Tribal, and utility offsite plans and preparedness are adequate to protect public health and safety in the emergency planning areas surrounding commercial nuclear power plants.

The proposed policy does not have the force or effect of law.

FEMA seeks comment on the proposed policy, which is available online at <http://www.regulations.gov> in docket ID FEMA–2013–0040. Based on the comments received, FEMA may make appropriate revisions to the proposed policy. Although FEMA will consider any comments received in the drafting of the final policy, FEMA will not provide a response to comments document. When FEMA issues a final policy, FEMA will publish a notice of availability in the **Federal Register** and make the final policy available at <http://www.regulations.gov>. The final policy will not have the force or effect of law.

SUPPLEMENTARY INFORMATION: This document provides notice that the BLM Field Office in Rawlins, Wyoming, has prepared a Draft RMP amendment with an associated EA, is announcing the beginning of the 60-day comment period, and seeks public comment on Visual Resource Management issues and proposed ACECs. The planning area is located in Albany, Carbon, Laramie, and eastern Sweetwater counties, Wyoming, and encompasses approximately 2,791,721 acres. The planning area does not include public land affected by the Chokecherry and Sierra Madre Visual RMP Amendment and Environmental Impact Statement (EIS). The Notice of Intent to prepare the amendment to the RMP was published on April 11, 2012 (77 FR 21803), and a 30-day public scoping period was held following publication from April 11, 2012, through May 10, 2012. The scoping comments were used during the preparation of the RMP Amendment and associated EA to help identify issues and concerns associated with the amendment, and to form the following alternatives:

- *Alternative 1:* No Action—Continuation of existing management direction for Visual Resources and ACECs; new information and data would not be incorporated;
- *Alternative 2:* Emphasis on the Development of Resources; incorporating new Visual Resource Inventory information and reducing the Blowout Penstemon ACEC;
- *Alternative 3:* Emphasis on the Protection of Resources; incorporating new Visual Resource Inventory information and expanding the Blowout Penstemon ACEC;
- *Alternative 4:* Emphasis on the Conservation of Resources; incorporating new Visual Resource Inventory information and expanding the Blowout Penstemon ACEC (Preferred Alternative).

This plan amendment addresses protests received following the publication of the 2008 Rawlins Proposed RMP/Final EIS, which identified issues with the Rawlins Field Office's analysis of both Visual Resources and the designation of ACECs. The Visual Resource Management decisions in the Proposed RMP/Final EIS were remanded and not approved in the Record of Decision until a complete Visual Resources Inventory was completed and a Visual Resource Management RMP amendment could be developed. In addition, comments received during initial scoping of the 2008 Rawlins RMP included nominations of five additional ACECs within the Rawlins Field Office boundary. Because the BLM did not review or consider relevance and importance criteria for the nominated ACECs in the 2008 Rawlins RMP planning process, these nominated areas are analyzed for ACEC designation in this planning process. The following ACEC nominations were evaluated to determine if the relevance and importance criteria were met, but were not included in any alternative because they did not meet relevance or importance criteria:

- McCarty Canyon; for scenic quality and wildlife habitat;
- Seminoe and Pathfinder Reservoirs; for sensitive plant species, scenic quality, and wildlife habitat;
- Flattop Mountain; for sensitive plant species, scenic quality, and wildlife habitat; and
- Ferris Mountain; for sensitive plant species and scenic quality.

The Ferris Dunes area was nominated as an ACEC in the 2008 Rawlins RMP for several sensitive plant species, a unique sand dune community and habitat, the desert kangaroo rat, and for scenic quality. The nominated Ferris
