

“Special Product Types” criteria: Kosher, Organic, Whole Grain, Vegan, and Vegetarian (no meat). Five data fields were added for this information that added one minute to the form completion time for each product submission. Food Connect was also changed so processors may enter the Child Nutrition (CN) label number for CN-labeled products. The USDA, CN Labeling Program provides food manufacturers the option to include a standardized food crediting statement on their product label. Labels must be authorized by USDA’s Food and Nutrition Service (FNS) prior to use, and manufacturers must have quality control procedures and inspection oversight that meet FNS requirements. Products produced in accordance with the CN Labeling Program are generally purchased by foodservice providers for FNS meal programs. One data field was added for the CN label number and resulted in an additional half-minute to complete the forms for each product submission.

In 2012, based upon the California Department of Education, AMS launched a modified USDA Food Connect Web site that included an enhanced link to the portal, titled “CA Competitive Foods,” that is viewable only by California schools. California has two sets of nutrition standards for competitive foods and beverages based on grade level: One for elementary schools and one for middle and high schools. The Web site enhancements allow California schools to select either one or both standards based on the type of school, and to find products that meet California’s nutrition standards for competitive foods and beverages. The California portal adds a half-minute and two data fields for processors and distributors who want to sell their products in California, allowing them to identify their products as meeting the State’s competitive foods laws.

This collection of information provides NMFS and the Western Pacific Fishery Management Council with data to determine whether a community that submits a community development plan meets the regulatory requirements for participation in the program, and whether the activities proposed under the plan are consistent with the intent of the program, the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable laws. The information is also important for evaluating potential impacts of the proposed community development plan activities on fish stocks, endangered species, marine mammals, and other components of the affected environment for the purposes of compliance with the National Environmental Policy Act, the Endangered Species Act and other applicable laws.
