Title: Importation of Mangoes from the Philippines

OMB Control Number: 0579-0172

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7711-7714), the Secretary of Agriculture, either independently or in cooperation with the States, is authorized to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests new to the United States or not known to be widely distributed throughout the United States. The Animal and Plant Health Inspection Service (APHIS) regulations on fruits and vegetables allow the importation of mangoes from Guimaras Island in the Republic of the Philippines into the United States under certain conditions. The regulations require the use of box marking to indicate the origin of the fruit, phytosanitary certificate to confirm that the fruit has been grown and treated in accordance with the regulations and a trust fund agreement between the Republic of the Philippines Department of Agriculture and APHIS to cover the Agency's participation in the treatment and inspection activities in the Philippines that are required for the importation of mangoes.

Need and Use of the Information: APHIS will collect information from a variety of individuals who are involved in growing, packing, handling, transporting and exporting plants and plant products. The information APHIS collects serves as the supporting documentation for issuing PPQ forms and documents required to authorize release of restricted products, and allow movement of regulated products. The information APHIS collects is vital to helping ensure that injurious plant diseases and insect pest are not imported and do not spread into or within the United States.
