and/or 500 kV transmission line and associated access roads. The primary need for the Proposed Project is to provide land lease income, sustainable renewable resources, new jobs and other benefits for the Tribe by using solar resources on Reservation lands where there is high potential for solar electric generation. A secondary need for the Proposed Project is to assist utilities in meeting their renewable energy goals by providing electricity generated from solar resources from Tribal lands that may be efficiently connected to existing transmission lines in a manner that minimizes adverse site impacts.

The proposed Federal action is the BIA approval of a solar energy ground lease and agreements entered into by the Tribe with Moapa Solar LLC (Applicant), and approval of ROWs and easements for the Applicant to construct, operate and maintain an up to 200 MW solar photovoltaic (PV) electricity generating facility and water pipeline on the Reservation. The proposed Federal action also includes the BLM approval of ROWs for the 230 kV and 500 kV transmission lines and access roads on BLM-administered Federal lands, and the BLM approval of ROWs for the portions of the 500 kV transmission line and water pipeline located within an existing utility corridor located on the Reservation.

The BIA and BLM will use the EIS to make decisions on the land lease and ROW applications under their respective jurisdiction; the EPA and NPS may use the document to make decisions under their authorities; the Tribe may use the EIS to make decisions under their Tribal Environmental Policy Ordinance; and the U.S. Fish and Wildlife Service may use the EIS to support its decision under the Endangered Species Act.
