other work subject to subpart V of 29 CFR part 1926” (78 FR 32110). Section II D, Paperwork Reduction Act, of the final rule, stated:

This rule, which expands the digger-derrick exemption, does not require any additional collection of information or alter the substantive requirements detailed in the 2010 ICR. The only impact on the collection of information will be a reduction in the number of entities collecting information. OMB did not require OSHA to submit a new proposed ICR when OSHA issued the proposed rule, and OSHA does not believe it is necessary to submit a new ICR to OMB now. OSHA will identify any reduction in burden hours when it renews the ICR. OSHA requested comment on this approach in the proposed rulemaking describing the digger-derrick exemption, but received none. OSHA has revised the ICR to exempt digger derricks used in construction work subject to 29 CFR part 1926 subpart V.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

• Whether the proposed information collection requirements are necessary for the proper performance of the Agency’s functions, including whether the information is useful;
• The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
• The quality, utility, and clarity of the information collected; and
• Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

As a result of expanding the digger-derrick exemption to include all digger derricks used in construction work subject to 29 CFR part 1926 subpart V, OSHA is requesting a program change subject to 29 CFR part 1926 subpart V.

OSHA is requesting a program change to OSHA’s current approved collection.

and Derricks Standard.

The accuracy of the information collection will be a reduction in the number of entities collecting information. OMB did not require OSHA to submit a new proposed ICR when OSHA issued the proposed rule, and OSHA does not believe it is necessary to submit a new ICR to OMB now. OSHA will identify any reduction in burden hours when it renews the ICR. OSHA requested comment on this approach in the proposed rulemaking describing the digger-derrick exemption, but received none. OSHA has revised the ICR to exempt digger derricks used in construction work subject to 29 CFR part 1926 subpart V.

III. Proposed Actions

As a result of expanding the digger-derrick exemption to include all digger derricks used in construction work subject to 29 CFR part 1926 subpart V, OSHA is requesting a program change subject to 29 CFR part 1926 subpart V. OSHA is requesting a program change subject to 29 CFR part 1926 subpart V.

OSHA will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB to extend the approval of the information collection requirements contained in the Cranes and Derricks Standard.

Type of Review: Revision of a currently approved collection.

Title: Cranes and Derricks in Construction (29 CFR part 1926 Subpart CC).

OMB Control Number: 1218–0261.

Affected Public: Business or other for-profits.

Number of Respondents: 209,851.

Total Responses: 2,558,718.

Frequency of Response: On occasion.

Average Time per Response: Varies from 30 seconds (communicate employee’s location to operator) to 1.5 hours (develop and document written assembly and disassembly procedures).

Estimated Total Burden Hours: 367,698 hours.

Estimated Cost (Operation and Maintenance): $2,029,130.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at http://www.regulations.gov, which is the Federal e-Rulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other materials must clearly identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA–2013–0021). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled ADDRESSES). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350, (TTY (877) 889–5627).

Comments and submissions are posted without change at http://www.regulations.gov. Therefore, OSHA cautions commenters about submitting personal information such as Social Security numbers and dates of birth. Although all submissions are listed in the http://www.regulations.gov index, some information (e.g., copyrighted material) is not publically available to read or download through this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the http://www.regulations.gov Web site to submit comments and access the docket is available through the Web site’s “User Tips” link. Contact the OSHA Docket Office for information about materials not available through the Web site, and for assistance in using the Internet to locate docket submissions.

V. Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 et seq.) and Secretary of Labor’s Order No. 1–2012 (77 FR 3912).

Signed at Washington, DC, on September 6, 2013.

David Michaels,
Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of Permit Applications Received under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by October 15, 2013. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

FOR FURTHER INFORMATION CONTACT: Adrian Dahood, ACA Permit Officer, at the above address or ACApermits@nsf.gov or (703) 292–7149.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antártica and
designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

**Application Details**

**Activity for Which Permit is Requested:** ASPA Entry; The applicant proposes to access the Blood Falls ASPA by foot to install instrumentation to assess the physical aspects of the Blood Falls system using non-destructive and non-invasive techniques. All instrumentation will be removed before this permit expires. Instruments to be deployed would include: ground penetrating radar (GPR), thermal imaging camera, embedded thermal sensors, stakes to measure ablation and GPS units to monitor the motion of the glacier. The GPR system will be moved carefully using a system of ice anchors, ice screws, and ropes that will be removed from the site when no longer in use. All embedded sensor strings will be removed before the permit expires. The applicants would wear clean footwear to enter to the ASPA to reduce the risk of non-native species invasions. The applicant would camp outside of the boundary of the area.

**Location:** ASPA 172 Lower Taylor Glacier and Blood Falls, McMurdo Dry Valleys. 
**Dates:** November 1, 2013 to February 15, 2015.

**Nadene G. Kennedy,**
**Polar Coordination Specialist, Division of Polar Programs.**

**FOR FURTHER INFORMATION CONTACT:** 
Adrian Dahood, ACA Permit Officer, at the above address or ACApermits@nsf.gov or (703) 292–7149.

**SUPPLEMENTARY INFORMATION:** The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

**Application Details**

1. **Applicant:** Jill Mikucki, Department of Microbiology, University of Tennessee, Knoxville, TN. Permit Application: 2014–014.

**Activity for Which Permit is Requested:** ASPA Entry; The applicants wish to access the Blood Falls outflow and subsurface brine conduit. They would use a mobile drill system and a small probe (Minimally Invasive Direct Glacier Exploration MIDGE) equipped with a camera to visualize the conduit. The applicant would collect biogeochemical samples to increase the body of knowledge on subglacial environments and aid in developing clean access methods. During the first field season, the applicant would familiarize themselves with the site and conduct only non-destructive and non-invasive sampling from the Blood Falls outflow. During the second field season, the applicant would use the drill and MIDGE probe to explore the Blood Falls crevasse and brine conduit. The instruments would penetrate approximately 50 meters and would not be near the glacier base or subglacial source of brine. Results from these studies could help inform management of the Blood Falls ASPA. Clean access techniques would be used and drilling would not go as deep as the base of the glacier or the source of the brine.

**Location:** ASPA 172 Lower Taylor Glacier and Blood Falls, McMurdo Dry Valleys. 
**Dates:** November 1, 2013 to February 15, 2015.

**Nadene G. Kennedy,**
**Polar Coordination Specialist, Division of Polar Programs.**

**FOR FURTHER INFORMATION CONTACT:** 
Adrian Dahood, ACA Permit Officer, at the above address or ACApermits@nsf.gov or (703) 292–7149.

**SUPPLEMENTARY INFORMATION:** The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

**DATES:** Interested parties are invited to submit written data, comments, or views with respect to this permit application by October 15, 2013. This application may be inspected by interested parties at the Permit Office, address below.

**ADRESSES:** Comments should be addressed to Permit Office, Room 755, Division of Polar Programs, National Science Foundation, 4201 Wilson Boulevard, Arlington, Virginia 22230.

**FOR FURTHER INFORMATION CONTACT:**
Adrian Dahood, ACA Permit Officer, at the above address or ACApermits@nsf.gov or (703) 292–7149.

**SUPPLEMENTARY INFORMATION:** The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.
