CFR 79, Subpart F, is covered by a separate information collection. Manufacturers are also required to submit periodic reports (annually for additives, quarterly and annually for fuels) on production volume and related information. The information is used to identify products whose evaporative or combustion emissions may pose an unreasonable risk to public health, thus meriting further investigation and potential regulation. The information is also used to ensure that fuel additives comply with EPA requirements for protecting catalytic converters and other automotive emission controls. The data have been used to construct a comprehensive data base on fuel and additive composition. The Mine Safety and Health Administration of the Department of Labor restricts the use of diesel additives in underground coal mines to those registered by EPA. Most of the information is business confidential.

Respondents/affected entities: Manufacturers and importers of motor-vehicle gasoline, motor-vehicle diesel fuel, and additives to those fuels.

Respondents obligation to respond: Mandatory per 40 CFR part 79.

Estimated number of respondents: 1850.

Frequency of response: On occasion, quarterly, annually.

Total estimated burden: 20,600 hours per year. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $1,898,875 per year. Includes $44,875 annualized capital or operation & maintenance costs.

Changes in estimates: There is an increase of 900 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to an increase in the number of registered fuels for which quarterly and annual reports are required.
