In accordance with the R&PP Act, the City of Durango filed an R&PP application to develop the above-described land as a storm water treatment facility to filter oils and other toxins found in storm water before discharging it into the Animas River. The BLM conducted a Phase I Environmental Site Assessment on...
April 29, 2013. No hazardous substances, petroleum products or recognized environmental conditions were identified on the parcel; no further inquiry is needed to assess Recognized Environmental Conditions.

The land is not needed for any Federal purposes. The lease and subsequent conveyance is consistent with the BLM San Juan/San Miguel Record of Decision and Approved Resource Management Plan dated September 5, 1985, and is in the public interest. The BLM has prepared an environmental assessment analyzing the City of Durango’s application and the proposed development and management plans.

A conveyance will be subject to the provisions of the R&PP Act and applicable regulations prescribed by the Secretary of the Interior, and the following reservation to the United States:

A reservation to the United States for ditches and canals constructed by the authority of the United States pursuant to the Act of August 30, 1890 (43 U.S.C. 945).

A conveyance will be subject to the following terms and conditions:

6. An indemnification clause protecting the United States from claims arising out of the patentee’s use, occupancy, or operations on the land.

7. Pursuant to the requirements established by Section 120(h) of the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 9620(h)), as amended by the Superfund Amendments and Reauthorization Act of 1988, (100 Stat. 1670), a notice that states that the above-described parcel was examined and no evidence was found to indicate that any hazardous substances were stored for 1 year or more, nor had any hazardous substances been disposed of or released on the subject property.

Upon publication of this notice in the Federal Register, the parcel will be segregated from all other forms of appropriation under the public land laws, except for lease and subsequent conveyance under the R&PP Act.

Mineral rights are held by third parties and the above segregation does not apply to them.

Classification Comments: Interested persons may submit comments involving the suitability of the land for development as a storm water treatment facility. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or whether the use is consistent with State and Federal programs.

Application Comments: Interested persons may also submit comments on the application, including the following:

1. The BLM of any encumbrances or other claims relating to the parcel, and regarding the specific use proposed in the application and plan of development; whether the BLM followed proper administrative procedures in reaching the decision to lease and convey the land under the R&PP Act; or any other factors not directly related to the suitability of the land for a storm water treatment facility.

2. Before including your address, phone number, email address, or any other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.
