A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

**Abstract:** The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A and any changes, or additions to the Provisions specified at 40 CFR part 60, subparts M, P, Q, R, S and Z. Owners or operators of the affected facilities must make an initial notification report, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

**Form Numbers:** None.

**Respondents/affected entities:**

Owners or operators of secondary brass and bronze production facilities, primary copper smelters, primary zinc smelters, primary lead smelters, primary aluminum reduction plants, and ferroalloy production facilities.

**Respondent's obligation to respond:** Mandatory (40 CFR part 60, subparts M, P, Q, R, S and Z).

**Estimated number of respondents:** 19 (total).

**Frequency of response:** Initially, occasionally, semiannually and annually.

**Total estimated burden:** 4,961 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$612,224 (per year), includes \$127,100 annualized capital or operation & maintenance costs.

**Changes in the Estimates:** There is an adjustment increase in the respondent burden from the most recently approved ICR. This increase is not due to any program changes. The increase is due to a correction in respondent burden activity associated with NSPS Subpart S. The previous ICR did not include the time required to prepare semiannual reports for the respondents. This correction results in an increase in respondent burden hours, costs, and the

total number of responses. There is also an increase in the respondent labor costs due to an update in labor rates. Further, there is an overall decrease in O&M costs due to an update in the number of sources. In this ICR, we estimate that two ferroalloy facilities are subject to Subpart Z and one primary lead facility is subject to subpart R; however, the affected sintering unit and blast furnace at this primary lead facility will be shutdown and will no longer have burden associated with the standards.

*Abstract:* This Information Collection Request (ICR) includes ambient air monitoring data and other supporting measurements reporting and recordkeeping activities associated with the Ambient Air Quality Surveillance Rule, 40 CFR part 58. This data and information are collected by various State and local air quality management agencies and Tribal entities, and reported to the Office of Air Quality Planning and Standards within the Office of Air and Radiation, EPA.

The data collected through this information collection consist of ambient air concentration measurements for the seven air pollutants with National Ambient Air Quality Standards (i.e., ozone, sulfur dioxide, nitrogen dioxide, lead, carbon monoxide, PM<sub>2.5</sub> and PM-10), ozone precursors, meteorological variables at a

select number of sites and other supporting measurements. Accompanying the pollutant concentration data are quality assurance/quality control data and air monitoring network design information.

The EPA and others (e.g., State and local air quality management agencies, tribal entities, environmental groups, academic institutions, industrial groups) use the ambient air quality data for many purposes, including informing the public and other interested parties of an area's air quality, judging an area's (e.g., county, city, neighborhood) air quality in comparison with the established health or welfare standards (including both national and local standards), evaluating an air quality management agency's progress in achieving or maintaining air pollutant levels below the national and local standards, developing and revising State Implementation Plans (SIPs) in accordance with 40 CFR 51, evaluating air pollutant control strategies, developing or revising national control policies, providing data for air quality model development and validation, supporting enforcement actions, documenting episodes and initiating episode controls, air quality trends assessment and air pollution research.

The State and local agencies and tribal entities with responsibility for reporting ambient air quality data and information as requested in this ICR submit these data electronically to the EPA's Air Quality System (AQS) database. Quality assurance/quality control records and monitoring network documentation are also maintained by each State and local agency, in AQS electronic format where possible.

*Respondents/Affected Entities:* State and local air pollution agencies and Tribal entities.

*Respondent's obligation to respond:* Mandatory.

*Estimated Number of Respondents:* 168.

*Frequency of Response:* Quarterly, but may occur more frequently.

*Total Estimated Annual Hour Burden:* 1,790,021 hours. Burden is defined at 5 CFR 1320.3(b).

*Total Estimated Annual Cost:* \$194,490,047. This includes an estimated labor cost of \$126,733,274 and an estimated cost of \$13,090,237 for operations and maintenance and \$54,666,536 for equipment and contract costs.

*Changes in the Estimates:* There is a decrease of 700,331 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's consolidation of monitors

into fewer sites, termination of unnecessary monitors, and more efficient procedures for measuring and reporting data.
