NUCLEAR REGULATORY COMMISSION

10 CFR Part 51

[NRC-2012-0246]

RIN 3150-AJ20

Proposed Waste Confidence Rule and Draft Generic Environmental Impact Statement

AGENCY: Nuclear Regulatory Commission.

ACTION: Public meetings.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) plans to hold public meetings to receive public comments on its forthcoming proposed amendments to the NRC's regulations pertaining to the environmental impacts of the continued storage of spent nuclear fuel beyond a reactor's licensed life for operation and prior to ultimate disposal (proposed Waste Confidence rule). In addition, the NRC will receive public comment on its forthcoming draft generic environmental impact statement (DGEIS), NUREG-2157, "Waste Confidence Generic Environmental Impact Statement," that forms the regulatory basis for the proposed amendments. The meetings are open to the public, and anyone may attend. The NRC is issuing this notice in advance of the release of the proposed Waste Confidence rule and DGEIS in order to maximize public participation at these meetings and ensure that as many parties as possible are able to attend. **DATES:** The NRC plans to hold public meetings in October and November 2013, during the 75-day public comment period for the proposed Waste Confidence rule and DGEIS. This document contains specific meeting information in the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION: As part of the public comment process, the NRC plans to hold 12 transcribed public meetings during the public comment period to solicit comments on the proposed Waste Confidence rule and DGEIS. The NRC plans to publish the proposed Waste Confidence rule and DGEIS in September 2013, and it will issue a notice of availability for the proposed rule and the DGEIS in the **Federal Register** at that time.

The proposed Waste Confidence rule would amend the NRC's regulations pertaining to the environmental impacts of the continued storage of spent nuclear fuel beyond a reactor's licensed life for operation and prior to ultimate disposal. The DGEIS forms the regulatory basis for the proposed amendments in the Waste Confidence rule. The DGEIS examines the potential environmental impacts that could occur as a result of the continued storage of spent nuclear fuel at at-reactor and

away-from-reactor sites until a repository is available. The DGEIS provides generic environmental impact determinations that would be applicable to a wide range of existing and potential future spent fuel storage sites. While some site-specific information is used in developing the generic impact determinations, the Waste Confidence DGEIS does not replace the environmental analysis, performed pursuant to the National Environmental Policy Act, associated with any individual site licensing action.

The NRC staff plans to hold the following public meetings during the planned, 75-day public comment period to present an overview of the DGEIS and proposed Waste Confidence rule and to accept public comments on the documents.

I. Background

1. Federal Credit Union Authority To Make Charitable Contributions

The Federal Credit Union Act (“the Act”) provides that an FCU may “exercise such incidental powers as shall be necessary or requisite to enable it to carry on effectively the business for which it is incorporated.”¹ Under this authority, the Board has long recognized that making charitable contributions and donations is among an FCU's incidental powers.²

Between 1999 and 2012, FCU donations were limited to two categories of charities: (1) non-profit organizations located or active in the community where the donor FCU had a place of business; and (2) tax-exempt organizations that “operated primarily to promote and develop credit unions.”³ An FCU's donation to these kinds of charities was conditioned on a determination by its board of directors that the donation was in the best interests of the FCU and reasonable given its size and financial condition.⁴ In 2012, the Board repealed the restrictions on permissible charities and
