

provider entity accredited by the national accrediting body's approved program would be deemed to meet the Medicare conditions. A national accrediting organization applying for approval of its accreditation program under part 488, subpart A, must provide us with reasonable assurance that the accrediting organization requires the accredited provider entities to meet requirements that are at least as stringent as the Medicare conditions.

II. Approval of Deeming Organizations

Section 1865(a)(2) of the Act and our regulations at § 488.8(a) require that our findings concerning review and approval of a national accrediting organization's requirements consider, among other factors, the applying accrediting organization's requirements for accreditation; survey procedures; resources for conducting required surveys; capacity to furnish information for use in enforcement activities; monitoring procedures for provider entities found not in compliance with the conditions or requirements; and ability to provide us with the necessary data for validation.

Section 1865(a)(3)(A) of the Act further requires that we publish, within 60 days of receipt of an organization's complete application, a notice identifying the national accrediting body making the request, describing the nature of the request, and providing at least a 30-day public comment period. We have 210 days from the receipt of a complete application to publish notice of approval or denial of the application.

The purpose of this proposed notice is to inform the public of the Compliance Team's request for initial CMS approval of its RHC accreditation program. This notice also solicits public comment on whether the Compliance Team's requirements meet or exceed the Medicare conditions for certification for RHC.

III. Evaluation of Deeming Authority Request

The Compliance Team submitted all the necessary materials to enable us to make a determination concerning its request for initial approval of its RHC accreditation program. This application was determined to be complete on July 26, 2013. Under section 1865(a)(2) of the Act and our regulations at § 488.8 (federal review of accrediting organizations), our review and evaluation of the Compliance Team will be conducted in accordance with, but not necessarily limited to, the following factors:

- The equivalency of the Compliance Team's standards for RHC's as

compared with our RHC conditions for certification.

- The Compliance Team's survey process to determine the following:
 - ++ The composition of the survey team, surveyor qualifications, and the ability of the organization to provide continuing surveyor training.
 - ++ The comparability of the Compliance Team's processes to those of state agencies, including survey frequency, and the ability to investigate and respond appropriately to complaints against accredited facilities.
 - ++ The Compliance Team's processes and procedures for monitoring a RHC found out of compliance with the Compliance Team's program requirements. These monitoring procedures are used only when the Compliance Team identifies noncompliance. If noncompliance is identified through validation reviews or complaint surveys, the state survey agency monitors corrections as specified at § 488.7(d).
 - ++ The Compliance Team's capacity to report deficiencies to the surveyed facilities and respond to the facility's plan of correction in a timely manner.
 - ++ The Compliance Team's capacity to provide us with electronic data and reports necessary for effective validation and assessment of the organization's survey process.
 - ++ The adequacy of the Compliance Team's staff and other resources, and its financial viability.
 - ++ The Compliance Team's capacity to adequately fund required surveys.
 - ++ The Compliance Team's policies with respect to whether surveys are announced or unannounced, to assure that surveys are unannounced.
 - ++ The Compliance Team's agreement to provide us with a copy of the most current accreditation survey together with any other information related to the survey as we may require (including corrective action plans).

This draft guidance also discusses factors to consider in determining the need for additional studies to characterize potential endocrine disruptor properties of a drug.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Endocrine Disruption Potential of Drugs: Nonclinical Evaluation." Endocrine disruptors are compounds that have the potential to interfere with some aspect of the endocrine system of an organism or its progeny. Any component of the endocrine system can be a target of endocrine disruptors, although the systems most commonly affected include the sex hormones (e.g., estrogen and androgen), the hypothalamic-pituitary-adrenal axis, the thyroid hormone, and the hormones involved in the feedback regulation of those components (e.g., gonadotropin releasing hormone and corticotropin). Changes in endocrine function can result in transgenerational effects (e.g., through epigenetic mechanisms). Epigenetic modifications are heritable changes in gene function that occur in the absence of changes to the nucleotide sequence. Because such changes can be maintained and transmitted through the germ cells, these modifications can affect gene actions across generations.
