Federal Aviation Administration

14 CFR Part 71

Establishment of Class D Airspace; Bryant AAF, Anchorage, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action corrects a final rule published in the Federal Register August 8, 2013 that establishes Class D airspace at Bryant Army Airfield (AAF), Anchorage, AK. In that rule, an error was made in the legal description for Bryant AAF, in that the language indicating Class D airspace as part time was left out.

DATES: Effective date, 0901 UTC, October 17, 2013. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT:
Richard Roberts, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA 98057; telephone (425) 203–4517.

SUPPLEMENTARY INFORMATION:

History
The FAA published a final rule in the Federal Register establishing Class D airspace at Bryant AAF, Anchorage, AK (78 FR 48299, August 8, 2013). In the regulatory text, language indicating the Class D airspace area is part time established in advance with a Notice to Airmen was omitted and is now included.

Class D airspace designations are published in paragraph 5000 of FAA Order 7400.9X, dated August 7, 2013, and effective September 15, 2013, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designations listed in this document will be published subsequently in that Order.

Correction to Final Rule

Accordingly, pursuant to the authority delegated to me, amending § 71.1 of the Federal Register on August 8, 2013 (78 FR 48299), FR Doc. 2013–18866, are corrected as follows:

§71.1 [Amended]

1. On page 48300, column 1, revise amending instruction 2 and the legal description for Bryant Army Airfield, Anchorage, AK, as published in the Federal Register on August 8, 2013 (78 FR 48299), FR Doc. 2013–18866, are corrected as follows:

AAL AK D Bryant Army Airfield, Anchorage, AK [Corrected]
Products office found the geographic coordinates of the Wasatch VORTAC needed to be corrected. This action makes the correction.

Class E airspace designations are published in paragraph 6006, of FAA Order 7400.9X dated August 7, 2013, and effective September 15, 2013, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in that Order.

The Rule

This action amends Title 14 Code of Federal Regulations (14 CFR) Part 71 by establishing Class E en route domestic airspace extending upward from 1,200 feet above the surface, at the Wasatch VORTAC navigation aid, Wasatch, UT, to accommodate IFR aircraft under control of Salt Lake City ARTCC by vectoring aircraft from en route airspace to terminal areas. This action is necessary for the safety and management of IFR operations. The geographic coordinates of the VORTAC are adjusted from (Lat. 40°51′01″ N., long. 111°58′55″ W.) to (Lat. 40°51′10″ N., long. 111°58′55″ W.) in accordance with the FAA’s aeronautical database. Except for administrative changes, and the changes listed above, this rule is the same as that proposed in the NPRM.

The FAA has determined this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle I, Section 106 discusses the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes controlled airspace at the Wasatch VORTAC, Wasatch, UT.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, “Environmental Impacts: Policies and Procedures,” paragraph 311a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.
