

considered the face and back veneers, in accordance with the descriptions above.

The core of hardwood and decorative plywood consists of the layer or layers of one or more material(s) that are situated between the face and back veneers. The core may be composed of a range of materials, including but not limited to veneers, particleboard, and medium-density fiberboard (“MDF”).

All hardwood and decorative plywood is included within the scope of this investigation regardless of whether or not the face and/or back veneers are surface coated, unless the surface coating obscures the grain, texture or markings of the wood in a permanent manner. Examples of surface coatings which may not obscure the grain, texture or markings of the wood include, but are not limited to, ultra-violet light cured polyurethanes, oil or oil-modified or water based polyurethanes, wax, epoxy-ester finishes, and moisture-cured urethanes. Hardwood and decorative plywood that has face and/or back veneers which have a permanent and opaque surface coating which obscures the grain, texture or markings of the wood, are not included within the scope of this investigation. Examples of permanently affixed surface coatings which may obscure the grain, texture or markings of wood include, but are not limited to, paper, aluminum, high pressure laminate (“HPL”), MDF, medium density overlay (“MDO”), and phenolic film. Additionally, the face veneer of hardwood and decorative plywood may be sanded, smoothed or given a “distressed” appearance through such methods as hand-scraping or wire brushing. The face veneer may be stained.

The scope of the investigation excludes the following items: (1) structural plywood (also known as “industrial plywood” or “industrial panels”) that is manufactured and stamped to meet U.S. Products Standard PS 1–09, PS 2–09, or PS 2–10 for Structural Plywood (including any revisions to that standard or any substantially equivalent international standard intended for structural plywood), including but not limited to the “bond performance” requirements set forth at paragraph 5.8.6.4 of that Standard and the performance criteria detailed at Table 4 through 10 of that Standard; (2) products which have a face and back veneer of cork; (3) multilayered wood flooring, as described in the antidumping duty and countervailing duty orders on Multilayered Wood Flooring from the People’s Republic of China, Import Administration, International Trade Administration, U.S. Department of Commerce Investigation Nos. A–570–970 and C–570–971 (published December 8, 2011), and additionally, multilayered wood flooring with a face veneer of bamboo or composed entirely of bamboo; (4) plywood which has a shape or design other than a flat panel; (5) products made entirely from bamboo and adhesives (also known as “solid bamboo”).
